Section 1

Introduction

This publication is intended to serve as a guide to the various sources of foreign trade statistics and to inform users of the content and general arrangement of the data.

The foreign trade statistics program is unique among the Census Bureau's economic statistics programs in that the information is not collected from forms sent to respondents soliciting responses as in the case of surveys. Rather, the information is compiled from forms and automated reports filed initially with the U.S. Customs Service or, in some cases, directly with the Census Bureau, for virtually all shipments leaving (exports) or entering (imports) the United States. Furthermore, exports to Canada are compiled from Canadian import data.

The United States may be said to have had an adequate set of export and import statistics only since about 1821. Existing figures on the total value of imports prior to 1821 were apparently estimated by the Secretary of the Treasury. In the case of exports, while it was required by statute that the dollar value should be reported by the master of the vessel on which the goods left the country, it was common practice for Customs officials to adjust this reported value quite arbitrarily. By an Act of Congress, approved in February 1820, provision was made for the preparation of statistical accounts of commerce of the United States with foreign countries to show the kinds, quantities, and value of all articles exported to and of all articles imported from each foreign country. The burden of reporting exports was shifted from the master of the vessel to the actual exporter thereby decreasing the need for adjustments by Customs. From these meager beginnings the statistics on U.S. foreign trade in merchandise have evolved to the current broad range of highly detailed statistics designed to meet the needs of a variety of users.

The most significant change in recent years occurred when the United States, in January 1989, adopted the Harmonized Commodity Description and Coding System (Harmonized System) as the nomenclature for classifying both exports and imports. The Harmonized System was developed, with United States participation, by the Customs Cooperation Council based in Brussels, Belgium. Most countries, including our major trading partners (Canada, the European Economic Community, and Japan), are using this system providing the benefits of increased data comparability between countries and the U.S./Canadian data exchange.

The development of sounder collection bases and greater detail in publicly available trade data occurred because of an increased need for accurate trade data for commercial, economic and political purposes.

Government uses the foreign trade statistics in developing the merchandise trade figures in balance of payments accounts: to appraise and analyze major movements and trends (commodity and geographic) in international trade; to evaluate and plan such programs as export expansion, agricultural development and assistance, and programs under the Foreign Assistance Act and the Merchant Marine Act; and to measure the impact of tariff and trade concessions under the General Agreement on Tariffs and Trade (GATT) and the Generalized System of Preferences (GSP). The foreign trade data are also used extensively as the statistical base to implement and analyze operations under various international agreements, such as the Multi-Fiber Agreement (MFA), the U.S.-Canadian Free Trade Agreement, etc.

Trade data are also used to meet a wide variety of legal and regulatory requirements. For example, accurate, detailed import data are essential to correctly assess import duties, administer embargoes and quotas, restrict counterfeit items entering the country, and implement control policies. Similarly, detailed export data are necessary to effectively administer export control and regulatory policies. Such export restrictions may be for national security or foreign policy reasons, for implementing export quotas or embargo programs, or for administering short supply programs.

Nongovernment users in industry, finance, research institutions, transportation, and other fields, use the foreign trade data to appraise the general trade situation and outlook; in share-of-the-market analyses and market penetration studies; in product and market development; for measuring the impact of competition; and, in general, as one of the statistical bases for determining marketing policies. The transportation industry in particular vessel and air-makes extensive use of the data not only in market share and penetration analyses but also in the critical area of anticipating the need for and design of future facilities and equipment.

The material in this Guide reflects the foreign trade statistical program in 1992. In view of the dynamic nature of the foreign trade statistics program and the desire to keep this program responsive to the varying needs of users, it is always possible that additional changes in the program may be required. As in the past, any changes of a substantial nature affecting the coverage or presentation of the statistics will be announced in the appropriate publications.

INTRODUCTION

This description covers all phases of the foreign trade statistics program and may contain portions not pertinent to this report.

SOURCE OF INFORMATION

Exports

Information on U.S. exports of merchandise from the U.S. to all countries, except Canada, is compiled from copies of Shipper's Export Declarations (SEDs) and SED data from qualified exporters, forwarders, or carriers. Copies of SED's are required to be filed with Customs officials at the port of export. The SED is unique among Census Bureau forms since it is not sent to respondents soliciting responses as in the case of surveys. The U.S. Customs Service initially collects the SED at the port of export and subsequently transmits it to the Census Bureau. Each SED represents a shipment of one or more kinds of merchandise from one exporter to one foreign importer on a single carrier. Filing the SED is mandatory under Chapter 9, Title 13, United States Code. Qualified exporters, forwarders, or carriers submit SED data by automated means directly to the Bureau of the Census.

The United States is substituting Canadian import statistics for U.S. exports to Canada in accordance with a 1987 Memorandum of Understanding signed by the Census Bureau, U.S. Customs Service, Canadian Customs, and Statistics Canada. Similarly, under this Memorandum of Understanding, Canada is substituting U.S. import statistics for Canadian exports to the United States. This data exchange includes only U.S. exports destined for Canada and does not include shipments destined for third countries by routes passing through Canada or shipments of certain grains and oilseeds to Canada for storage prior to exportation to a third country. These shipments are reported on and compiled from SED's.

Department of Defense Military Assistance Program Grant-Aid shipments being transported as Department of Defense cargo are reported directly to the Bureau of the Census by the Department of Defense.

Imports

Published information on U.S. imports of merchandise is compiled primarily from automated data submitted through the U.S. Customs' Automated Commercial System. Data are compiled also from import entry summary forms, warehouse withdrawal forms and Foreign Trade Zone documents as required by law to be filed with the U.S. Customs Service. Data on imports of electricity and natural gas from Canada are obtained from Canadian sources.

COVERAGE

General

The official U.S. import and export statistics reflect both government and nongovernment shipments of merchandise between foreign countries and the U.S. Customs Territory (the 50 States, District of Columbia, and Puerto Rico), U.S. Foreign Trade Zones, and the U.S. Virgin Islands, without regard to whether or not a commercial transaction is involved. In general, the statistics record the physical movement of merchandise between the United States and foreign countries.

The statistics used to compile the merchandise trade balance exclude the following types of transactions:

- a. United States trade with U.S. possessions, trade between U.S. possessions, and trade between U.S. possessions and foreign countries (except Puerto Rico and the U.S. Virgin Islands).
- b. Merchandise shipped in transit through the United States from one foreign country to another.
- c. Shipments to the U.S. Armed Forces, including post exchanges, for their own use, as well as U.S. merchandise returned by the U.S. Armed Forces for their own use.
- d. Monetary gold and silver.
- e. Issued monetary coins (in current circulation) of all component metals.
- f. Bunker fuels and other supplies and equipment for use on departing vessels, planes, or other carriers engaged in foreign trade.
- g. Shipments of furniture, equipment and supplies to U.S. government agencies as well as such merchandise when returned to the United States.
- h. Imports of articles repaired under warranty.
- i. Some other transactions not considered to be of statistical importance, such as shipments of personal and household effects of travelers and certain temporary exports and imports.

Exports

Exports measure the total physical movement of merchandise out of the United States to foreign countries whether such merchandise is exported from within the U.S. Customs territory or from a U.S. Customs bonded warehouse or a U.S. Foreign Trade Zone. The following are examples of some types of shipments which are included in the statistics but are of such a nature that their inclusion merits separate mention:

- a. Department of Defense Military Assistance Program Grant-Aid shipments under the Foreign Assistance Act.
- b. Foreign military sales.
- c. Shipments of commodities for economic assistance under the Foreign Assistance Act. (Totals for exports under this program are published quarterly or as they become available.)
- d. Shipments of agricultural commodities under P.L. 480 (Agricultural Trade Development and Assistance Act of 1954) as amended, and related laws. (Totals for exports under this program are published as the data become available from the Department of Agriculture. Additional information may be obtained from the Economic Research Service of the Department of Agriculture.)
- e. Sales of U.S. vessels to purchasers in foreign countries.
- f. Satellites launched by U.S. space vehicles limited to: (1) foreign origin, and/or; (2) launched on behalf of international organizations.

Domestic Exports

Exports of domestic merchandise include commodities which are grown, produced or manufactured in the United States, and commodities of foreign origin which have been changed in the United States, including U.S. Foreign Trade Zones, from the form in which they were imported, or which have been enhanced in value by further manufacture in the United States.

Foreign Exports (Re-exports)

Exports of foreign merchandise (re-exports), consist of commodities of foreign origin which have entered the United States for consumption or into Customs bonded warehouses or U.S. Foreign Trade Zones, and which, at the time of exportation, are in substantially the same condition as when imported.

Imports

Imports of merchandise include commodities of foreign origin as well as goods of domestic origin returned to the United States with no change in condition or after having been processed and/or assembled in other countries. (See discussion of American Goods Returned After Processing And/Or Assembly below).

For statistical purposes, imports are classified by the type of transaction.

- a. Merchandise entered for immediate consumption. ("duty free" merchandise and merchandise on which duty is paid on arrival)
- b. Merchandise withdrawn for consumption from Customs bonded warehouses, and U.S. Foreign Trade Zones.
- c. Merchandise entered into Customs bonded warehouses and U.S. Foreign Trade Zones from foreign countries.

Bonded Warehouses

Bonded warehouses are authorized by U.S. Customs for storage or manufacturing of goods on which payment of duties is deferred until the goods are removed into Customs Territory. These goods are not subject to duties if reshipped to foreign points.

Foreign Trade Zones

Foreign Trade Zones are enclosed areas, operated as public utilities, under control of U.S. Customs with facilities for handling, storing, manipulating, manufacturing, and exhibiting goods. The merchandise may be exported, destroyed, or sent into Customs territory from the zone, in the original package or otherwise. It is subject to Customs duties if sent into Customs territory, but not if reshipped to foreign points.

American Goods Returned After Processing and/or Assembly

Domestically produced goods are shipped from the United States to other countries for processing and/or assembly and then returned to this country. Imports containing U.S. content which qualify for special duty-free treatment on the U.S. portion fall into the following groups:

- a. Articles of metal manufactured in the United States, which were exported for further processing abroad and returned to the United States for more processing.
- b. Textile articles assembled abroad and entered under a Special Access Program or Special Regime.
- c. Articles assembled abroad from components produced in the United States, except textile articles entered under a Special Access Program or Special Regime.

Separate statistics are available on American goods returned after processing and/or assembly abroad.

General Imports

"General Imports" measure the total physical arrivals of merchandise from foreign countries, whether such merchandise enters consumption channels immediately or is entered into bonded warehouses or Foreign Trade Zones under Customs custody.

Imports for Consumption

"Imports for Consumption" measure the total of merchandise that has physically cleared through Customs either entering consumption channels immediately or entering after withdrawal for consumption from bonded warehouses under Customs custody or from Foreign Trade Zones. Many countries use the term "special imports" to designate statistics compiled on this basis.

STATISTICAL MONTH

The month of importation is the month in which the U.S. Customs Service releases the merchandise to the importer.

The month of exportation is based on the date when the merchandise leaves the United States. (For vessel or air shipments, it is the date when the carrier departs or is cleared from the port of export.)

MERCHANDISE TRADE BALANCE

The merchandise trade balance represents the difference between U.S. exports based on f.a.s values and U.S. general imports based on Customs values. (See discussion of Valuation below.) This balance corresponds to a measurement of the international payments or credit flows resulting from the physical movement of goods between the U.S. and foreign countries. Monthly balances are based on seasonally adjusted data.

SEASONAL ADJUSTMENT

The Census Bureau is seasonally adjusting the merchandise trade data at the most detailed end-use level possible. These detailed data are then summed to the 1-digit level for release with the monthly merchandise trade totals.

The seasonally adjusted data are also provided to the Bureau of Economic Analysis (BEA) for use in compiling the quarterly National Income and Product Accounts (NIPAS). The BEA supplements these data in the NIPAS with quarterly adjustments for six of the end-use categories which exhibit seasonality on a quarterly basis but not on a monthly basis.

The 1-digit level end-use categories provide data for the following broad aggregates: (1) Foods, feeds, and beverages; (2) Industrial supplies and materials; (3) Capital goods, except automobiles; (4) Automotive vehicles, parts and engines; (5) Consumer goods (nonfood), except auto; and (6) Other merchandise. This seasonal adjustment procedure is designed to reflect seasonal patterns at the most detailed commodity levels. The adjustment is made at that end-use commodity level for which significant stable seasonality is identified.

The use of the end-use commodity classification system for seasonal adjustment ensures methodological consistency with the quarterly adjusted balance of trade data published by the Bureau of Economic Analysis (BEA) and reflects the BEA coding descriptions which combine data into broad categories based upon principal uses of the commodities.

The Summary of U.S. Export and Import Merchandise Trade (FT 900) for each month includes revisions for carryover to the prior month's aggregate unadjusted and seasonally adjusted (current and constant dollar) export, import and trade balance figures as well as to the end-use totals. These revisions do not appear in other foreign trade reports.

Tables of the seasonal factors are available free of charge from the Foreign Trade Division. Historical data as well as the detailed unadjusted and adjusted data are available on a cost basis on either hard copy or diskette.

CONSTANT DOLLAR ADJUSTMENT

Effective with January 1990 statistics, the Census Bureau is publishing, on an experimental basis, seasonally adjusted merchandise trade data on a constant dollar basis (1987 = 100). This is a requirement of the Omnibus Trade and Competitiveness Act of 1988. Publication of these additional data improves the ability of users to examine trends in import and export volumes. Because merchandise trade is volatile, cumulations of data over at least a three-month period are recommended in order to identify underlying trends.

These data are adjusted for price change using monthly deflators developed in accordance with the deflators used in the National Income and Product Accounts (NIPA) published by the Bureau of Economic Analysis (BEA). These deflators are based upon price indexes and deflators produced by the Bureau of Labor Statistics, BEA, and other sources. All series are adjusted at the lowest possible end-use level. (See discussion of End Use Commodity Category under Commodity Classifications).

VALUATION**Customs Import Value**

The Customs value is the value of imports as appraised by the U.S. Customs Service in accordance with the legal requirements of the Tariff Act of 1930, as amended. This value is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. The term "price actually paid or payable" means the total payment (whether direct or indirect, and exclusive of any costs, charges, or expenses incurred for transportation, insurance, and related services incident to the international shipment of the merchandise from the country of exportation to the place of importation in the United States) made, or to be made, for imported merchandise by the buyer to, or for the benefit of, the seller. In the case of transactions between related parties, the relationship between buyer and seller should not influence the Customs value.

In those instances where assistance was furnished to a foreign manufacturer for use in producing an article which is imported into the United States, the value of the assistance is required to be included in the value reported for the merchandise. Such "assistants" include both tangible and intangible assistance, such as machinery, tools, dies and molds, blue prints, copyrights, research and development, and engineering and consulting services. If the value of these "assistants" is identified and separately reported, it is subtracted from the value during statistical processing. However, where it is not possible to isolate the value of "assistants", they are included. In these cases the unit values may be increased due to the inclusion of such "assistants".

Import Charges

The import charges represent the aggregate cost of all freight, insurance, and other charges (excluding U.S. import duties) incurred in bringing the merchandise from alongside the carrier at the port of exportation in the country of exportation and placing it alongside the carrier at the first port of entry in the United States. In the case of overland shipments originating in Canada or Mexico, such costs include freight, insurance, and all other charges, costs and expenses incurred in bringing the merchandise from the point of origin (where the merchandise begins its journey to the United States) in Canada or Mexico to the first port of entry.

C.I.F. Import Value

The c.i.f. (cost, insurance, and freight) value represents the landed value of the merchandise at the first port of arrival in the United States. It is computed by adding "Import Charges" to the "Customs Value" (see definitions above) and therefore excludes U.S. import duties.

Dutiable Value of Imports and Calculated Duty

The "dutiable value" represents, in general, the Customs value of foreign merchandise imported into the United States which is subject to duty. The "Calculated duty" represents the estimated import duties collected. Estimated duties are calculated based on the applicable rate(s) of duty as shown in the Harmonized Tariff Schedule of the United States Annotated for Statistical Reporting Purposes. See Section II (Reference Aids) of this Guide for a list of rate provision codes which indicate the free or dutiable status of merchandise imported into the United States.

F.A.S. Export Value (Excluding Exports to Canada)

The f.a.s. (free alongside ship) value is the value of exports at the U.S. seaport, airport, or border port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. The value, as defined, excludes the cost of loading the merchandise aboard the exporting carrier and also excludes freight, insurance, and any charges or transportation costs beyond the port of exportation.

U.S. Exports to Canada

The use of Canada's import data to produce U.S. export data requires some adjustments to make the two comparable.

U.S. exports are valued at the U.S. seaport, airport, or border port of export in the U.S. and include inland freight charges. Canadian imports are valued at the point of origin in the U.S. and do not include inland freight to the U.S. port of exit. To compensate, Canada adds an estimated 4.5 percent of the value to each transaction to cover inland freight (except for shipments where freight is not a consideration, e.g., large aircraft, vessels and drilling platforms.)

Average monthly exchange rates as quoted by the Federal Reserve Board are applied to adjust the Canadian import data to U.S. dollars. A formula for converting U.S. total exports to corresponding Canadian imports is provided in the initial release of the statistics (FT 900) along with the monthly conversion rate.

COMMODITY CLASSIFICATIONS

Schedule B

The export statistics are initially collected and compiled in terms of approximately 8,000 commodity classifications in Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. Schedule B is a U.S. Bureau of the Census publication and is based on the Harmonized Commodity Description and Coding System (Harmonized System).

Harmonized Tariff Schedule of the United States Annotated for Statistical Reporting Purposes

The import statistics are initially collected and compiled in terms of approximately 14,000 commodity classifications in the Harmonized Tariff Schedule of the United States Annotated for Statistical Reporting Purposes (HTSUSA), an official publication of the U.S. International Trade Commission. The HTSUSA is the U.S. import version of the Harmonized System.

The United States and Canada both compile their merchandise trade statistics in terms of the Harmonized System; however, they have different annotations beyond the basic 6-digit codes.

Approximately 80 percent of the U.S. Schedule B export classifications are directly comparable to Canadian import classifications. These classifications account for 85-90 percent of the total value of U.S. exports to Canada. Many of the remaining 20 percent of the Schedule B classifications represent little or no trade with Canada. In these cases, the Canada import code is recoded to a single Schedule B, usually the class with the most trade or the residual classification for the root 6-digit Harmonized System code.

There are some instances where the U.S. and Canadian Customs agencies do not agree on the 6-digit Harmonized System code under which a particular commodity or group of commodities should be classified. In these cases each statistical agency may classify under the 6-digit code designated by its national Customs agency. Efforts by the U.S. and Canadian Customs agencies to align detail statistical classifications will continue over the next several years.

In some reports the HTSUSA and Schedule B classifications are rearranged and summarized into other classification systems as indicated below:

Standard International Trade Classification (SITC-United Nations Statistical Papers, Series M, No. 34/Rev.3).

The SITC is a statistical classification of the commodities entering external trade designed to provide the commodity aggregates needed for purposes of economic analysis and to facilitate the international comparison of trade-by-commodity data.

The Harmonized System and SITC Revision 3 are inter-related. The rearrangement of import and export data reported in terms of the Harmonized System into the SITC allows for an additional means of comparison between the U.S. and its trading partners in terms of commodity classification and trade statistics.

Certain foreign trade reports present HTS and Schedule B classifications summarized into approximately 3,000 5-digit SITC codes.

Within the SITC framework, "Manufactured Goods" includes all products classified in groups 5 through 9.

Manufactured goods conform to the SITC sections that include chemicals and related products, n.s.p.f.; manufactured goods classified chiefly by material; machinery and transport equipment; miscellaneous manufactured articles, n.s.p.f.; and commodities and transactions not classified elsewhere.

Standard Industrial Classification (SIC-Office of Management and Budget, 1987).

The rearrangement of the import and export data into a structure related to the statistical classification of products by industry facilitates the comparison of the U.S. import and export statistics with data related to the domestic production and other U.S. economic statistics.

HTSUSA and Schedule B classifications are summarized into approximately 450 4-digit SIC-based Import and approximately 430 4-digit SIC-based Export codes.

End Use Commodity Category

The HTSUSA and Schedule B classifications are summarized into six principal "end-use" categories and further subdivided into about 140 broad commodity groupings. These categories are used in developing seasonally adjusted and constant dollar totals. The concept of end-use demand was developed for balance of payments purposes by the Bureau of Economic Analysis. (See discussion of Seasonal Adjustment).

Agricultural and Nonagricultural Commodities

Agricultural commodities consist of nonmarine food products, natural fibers, unmanufactured tobacco, and other farm products subject to federal legislation such as Section 22 of the Agricultural Adjustment Act. Some processed agricultural commodities are included if the value added by manufacturing accounts for less than 50 percent of the final value of shipments as reported in the latest Census of Manufactures. Examples of processed agricultural commodities include cereal flours, dairy products, canned meats, canned fruits and vegetables, vegetable oils, animal hides, fur pelts, wine, and beer. Textiles, leather products, distilled beverages, forestry, and fishery products are classified as nonagricultural commodities.

Assignments of individual HTSUSA and Schedule B classifications generally are determined by the U.S. Department of Agriculture and differ from the guidelines in the Standard Industrial Classification of the United States (SIC).

Advanced Technology Products (ATP)

Approximately 500 of the HTSUSA and Schedule B commodity classification codes used in reporting U.S. exports and imports are identified as "advanced technology" codes that must meet the following criteria:

- a. The code contains products whose technology is from a recognized high technology field (e.g., biotechnology).
- b. These products represent leading edge technology in that field.
- c. Such products constitute a significant part of all items covered in the selected classification code.

This product and commodity-based measure of advanced technology differs from broader SIC industry-based measures which include all commodities produced by a particular industry group, regardless of the level of technology embodied in the commodities.

COUNTRY DESIGNATIONS

Country Classification

The names and codes of the countries of the world are listed in Schedule C, Classification of Country and Territory Designations for U.S. Foreign Trade Statistics, the system used for publishing both import and export country statistics. Schedule C is arranged in geographic order according to continents. Countries and territories are listed in sequence within each continent, generally from north to south and west to east. The classifications appearing in Schedule C conform to those prescribed by the International Organization for Standardization (ISO) and are recommended by ISO for international exchange. Schedule C is published as a statistical annex in HTSUSA and as a part of Schedule B.

Export Country of Destination

Country of destination for exports is the country where the goods are to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. If the shipper does not know the country of ultimate destination, the shipment is credited to the last country to which the shipper knows that the merchandise

will be shipped in the same form as when exported. (See discussion of the designation for Unidentified Countries under Statistical Presentation below.)

Import Country of Origin

Country of origin for imports is the country where the merchandise was grown, mined, or manufactured, in accordance with U.S. Customs Regulations. In instances where the country of origin cannot be determined, transactions are credited to the country of shipment. Certain foreign trade reports show country subcodes to indicate special tariff treatment afforded some imported articles. See Section II (Reference Aids) of this Guide for a list of country subcodes.

Statistical Presentation

Abbreviated country designations are used in lieu of complete country names in the foreign trade program. Numerical codes are used for automated purposes. Alphabetic abbreviations are used for published reports.

The designation UNIDENT (Unidentified Countries) in the export statistics, reflects shipments of certain grains and oilseeds for storage in Canada but ultimately destined for third countries, the specific country of ultimate destination being unknown at the time of shipment. This is not a part of the U.S./Canada Data Exchange. Annually, by Special Announcement, based on information supplied by the U.S. Department of Agriculture, specific country of destination information on exports of such grains and oilseeds is published. This designation also includes satellites launched in the United States on behalf of international organizations.

The designation OTH CTY used in some reports represents the total for countries from or to which imports or exports of the particular commodity averaged less than a \$50,000 per month on a cumulative year-to-date basis.

The major world areas for which foreign trade data are shown represent individual Schedule C countries or groupings of several countries into geographic areas or economic unions. (See Section 10 on Country Groupings.)

QUANTITY AND SHIPPING WEIGHT

Quantity

Units of quantity shown are published in terms of the units specified in the HTSUSA and Schedule B for each classification.

When two units of quantity are required for an item in the HTSUSA or Schedule B, both units are shown along with the value.

Shipping Weight

Shipping weight represents the gross weight in kilograms of shipments, including the weight of moisture content, wrappings, crates, boxes, and containers (other than cargo vans and similar substantial outer containers). Shipping weight information is available for shipments by vessel and air only.

CUSTOMS DISTRICTS

District and Port Classification

The names and codes of the Customs districts and ports are listed in Schedule D, Classification of U.S. Customs Districts and Ports for Foreign Trade Statistics. The geographical limits of each district are published in the U.S. Customs Regulations. Schedule D is published as a statistical annex in HTSUSA and as a part of Schedule B.

District of Exportation

- Vessel or air - the Customs district in which the merchandise is loaded on the vessel or aircraft which takes the merchandise out of the country.
- Rail, truck, pipeline, or other overland transportation - the Customs district through which the merchandise crosses the U.S. border into foreign territory.
- Aircraft exported under their own power are credited to the Customs district from which they are flown out of the United States.

Import District of Entry

The district in which merchandise clears Customs for entry into consumption channels, bonded warehouses or Foreign Trade Zones.

Import District of Unlading

The district where merchandise is unloaded from the importing vessel or aircraft.

Statistical Presentation

Abbreviated Customs district designations are used instead of complete names in the foreign trade program. Numerical codes are used for automated purposes. Alphabetic abbreviations are used for published reports.

Special Districts

The following types of shipments are included for statistical purposes in special Customs districts and are not reported by geographical location of the individual Customs district of entry or exportation:

- Vessels under their own power or afloat (imports and exports)
- Low-valued imports and exports (See discussion of Low-Valued Statistics below)
- Mail shipments (exports only)
- Norfolk, VA-Charleston, SC-Mobile, AL (Exports of bituminous coal). See discussion of Customs Districts under Sources of Error.
- Wilmington, NC-Savannah, GA (Exports of cotton linter pulp). See discussion of Customs Districts under Sources of Error.

STATE STATISTICS

Export data by state denote the state (as reported by the exporter or agent on the Shipper's Export Declaration) from which the merchandise actually starts its journey to the port of export. This may not be, necessarily, the state where the merchandise is grown, produced or manufactured nor necessarily the actual location of the exporter. In the case of consolidated shipments, it is the state of the commodity of greatest value or the state of consolidation. Foreign Trade Zone shipments are included in the U.S. Total, States/Territories total and distributed among individual states and territories. A separate Foreign Trade Zone total is shown for reference only.

LOW-VALUED STATISTICS

Exports

Export statistics are fully compiled on shipments to all countries, except Canada, where the value of commodities classified under each individual Schedule B number is over \$2,500. Value data for such commodities valued under \$2,501 are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. The estimates for low-valued shipments are shown under a single Schedule B number and are omitted from the statistics for the detailed commodity classifications. Shipments valued under \$2,501 to all countries, except Canada, represent slightly less than 2.5 percent of the monthly value of U.S. exports to those countries.

As a result of the data exchange between the U.S. and Canada, the U.S. has adopted the Canadian import exemption level for its export statistics on shipments to Canada. The Canadian import exemption level is based on total value per shipment rather than value per commodity classification line item. Prior to data exchange each month, the U.S. furnishes Canada with a factor to convert data reported on Canadian import documents from Canadian dollars to U.S. dollars. Line items reported on documents where the

total shipment value is the equivalent of \$900 (Can.) or more are included in the appropriate Schedule B classifications in Chapters 1-97. Out of this group, those items valued \$2500 (U.S.) or less are combined and assigned to the special Customs district for low value exports with no method of transportation detail. The remaining items, i.e., those valued over \$2500 (U.S.) are published with both Customs district and method of transportation detail. Items reported on Canadian documents having a total shipment value equivalent to less than \$900 (Can.) are published under a single Schedule B number established for Canadian low-value shipments and certain other shipments that Canada does not identify by kind. Such shipments represent 2 percent of the monthly value of U.S. exports to Canada.

Imports

Import statistics are fully compiled on shipments valued over \$1,250 or, under certain textile programs, for any article which must be reported on a formal entry. Value data for shipments valued under \$1,251 and not required to be reported on formal entries are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. The estimates for low-valued shipments are shown under a single HTS number. They are omitted from the statistics for the individual commodity classifications. The total value excluded represents slightly less than 1 percent of the monthly import value.

TRANSPORTATION STATISTICS

Method of Transportation

The transportation statistics are presented in terms of three categories - vessel, air and all methods - based on the method of transportation by which the merchandise arrived in or departed from the United States. In some instances, shipments between the United States and countries abroad enter or depart through Canada or Mexico. Such shipments are recorded under the method of transportation by which they enter or depart the United States regardless of the transportation mode between Canada or Mexico and the country of origin or destination.

There are some differences in the coverage of these statistics, primarily as follows:

- The data for "all methods of transportation" include exports and general imports by vessel, air, truck, rail, air mail, parcel post, and other methods of transportation.
- The data for vessel and air exports and general imports represent waterborne and airborne shipments only (merchandise actually leaving or arriving in the United States aboard a vessel or an aircraft).

- Imports and exports of (a) vessels moving under their own power or afloat and (b) aircraft flown into or out of the United States are included in the "all methods" data but excluded from the vessel and air statistics.
- Mail and parcel post shipments (including those transported by vessel or air) are included in the "all methods" data but excluded from the vessel and air statistics.
- Low-value shipments are included in the "all methods" data but excluded from the vessel and air statistics.

Types of Vessel Service

Waterborne statistics are presented in terms of type of service: (1) liner; (2) irregular or tramp; and (3) tanker.

Liner service is that type of service offered by a regular line operator of vessels on berth. The itineraries and sailing schedules of vessels in liner service are predetermined and fixed.

Irregular (or tramp) service is that type of service afforded by vessels, other than tanker vessels, that are chartered or otherwise hired for the carriage of goods on special voyages. Vessels in this type of service are not on berth and their sailing schedules are not predetermined or fixed.

Tanker vessels are primarily designed for the carriage of liquid cargoes in bulk. All others are classified as dry cargo.

Intransit Shipments

Shipments of merchandise transported in bond through the United States en route from one foreign country to another without having been entered as an import are called in-transit shipments. The in-transit statistics include only inbound or outbound merchandise moving by vessel.

Vessel entrances and clearances by Customs district are published monthly.

U.S. TRADE WITH PUERTO RICO AND U.S. POSSESSIONS

Source of Information

Statistics on shipments from the United States to Puerto Rico and the Virgin Islands, and on shipments from Puerto Rico to the United States, are compiled from information furnished on Shipper's Export Declarations, which are required to be filed with Customs officials, and shipments by qualified exporters who have been authorized to submit data by automated means directly to the Bureau of the Census.

Statistics on shipments from the U.S. Virgin Islands and other U.S. possessions to the United States are compiled from automated data submitted through the Customs Automated Commercial System and from import documents filed with Customs officials.

Data on shipments from the U.S. to other U.S. possessions as well as between the possessions are not compiled.

Coverage

Statistics are separately published covering shipments 1) between the United States and Puerto Rico, 2) between the United States (including Puerto Rico) and the U.S. Virgin Islands, and 3) from other U.S. possessions to the United States. U.S. possessions refers to those listed in Schedule C, Classification of Country and Territory Designations for U.S. Foreign Trade Statistics.

Previous discussions and definitions relating to the export statistics should be applied to statistics on shipments from the United States to Puerto Rico and the U.S. Virgin Islands, and on shipments from Puerto Rico to the United States. Similarly, previous discussions and definitions relating to the import statistics should be applied to statistics on shipments from the U.S. Virgin Islands and other U.S. possessions to the United States.

Trade with Foreign Countries

Puerto Rico is a Customs district within the U.S. Customs territory, and its trade with foreign countries is included in the U.S. export and import statistics.

The U.S. export and import statistics include merchandise trade between the U.S. Virgin Islands and foreign countries even though the Virgin Islands of the United States are not officially a part of the U.S. Customs territory.

Data on trade of other U.S. outlying possessions with foreign countries is not compiled by the the United States.

SOURCES OF ERROR

The procedures used to compile the statistics include processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Export and import figures are subject to the possibility of errors which may arise from incorrect reporting and/or processing of information as to commodity classification, net quantity, value, and other statistical factors, month of inclusion (see Carryover below), and errors which may result from the estimation of certain shipments. (See the explanation of low-valued data above.)

Carryover

Carryover is the term used to identify the trade records received and/or processed too late for inclusion with records for that transaction month.

There are several causes of carryover. Among them is the Customs procedure which allows importers to file import documentation up to ten workdays after the date of release of the merchandise. Processing problems such as rejection of a shipment because the data failed to meet certain edit criteria established to protect the accuracy of the statistics also contribute to carryover. The current carryover rate is 0.5 percent for exports and 2.5 percent for imports.

Each month, in the Summary of U.S. Export and Import Merchandise Trade (FT 900) only, the total import, export and trade balance figures as well as the "end-use" totals for the prior month are adjusted for carryover. SITC and country detail data are not revised.

Estimated Calculated Duty

Estimates of calculated duty do not necessarily reflect amounts of duty paid and should, therefore, be used with caution. The figures may be somewhat overstated as a result of the inclusion in the figures of some U.S. products returned after processing or assembly abroad for which a portion of the value is eligible for duty free consideration. In cases where articles are dutiable at various or special rates, a dutiable value is shown but no duty is calculated. Estimates of calculated duty are understated to the extent that these situations exist.

Shipments Not Classified by Commodity

Single classifications are provided for the following shipments without commodity detail:

- a. Exports to all countries, except Canada, valued under \$2,501.
- b. Exports to Canada, reported on Canadian documents having a total shipment value less than \$900 (Can.).
- c. Exports to all countries, except Canada, valued \$2,501 through \$10,000 which are reported on Shipper's Export Declarations without a valid Schedule B number. (The U.S./Canada data exchange allows that portion of the value formerly shown under this classification as exports to Canada to be distributed among the appropriate commodity classifications.)
- d. Exports of goods of Canadian origin being returned to Canada.
- e. Exports of goods of other foreign origin being returned to Canada.
- f. Import transactions valued under \$1,251 (and not requiring formal entry).

Classifications other than those listed above exclude the information shown under these provisions and are undercounted to the extent that such shipments are made.

Comparison of Commodity Data

The omission of a commodity number from certain reports does not necessarily mean that there were no exports or imports of the commodity during the month. It is possible that some shipments may not be classified by commodity (see discussion above).

Data users are cautioned that comparison of U.S. exports with corresponding Canadian import data at detailed commodity levels is not recommended. Corrections, differences in classification interpretation and in editing and processing environments make these comparisons uncertain.

In addition, the comparison of data on U.S. exports after 1989 with data for prior years at levels other than for total exports and exports by country may show distortion. These distortions may result from the availability of detailed data for undocumented exports to Canada which were previously estimated only at the total level. Distortions also may result from the changeover to the Harmonized System effective with the January 1989 statistics.

When publication of data under a particular commodity classification causes disclosure of an individual firm's transactions on a world-wide basis, it is sometimes necessary to combine several classifications into one. Even though the detail is reported it is published under the combined classification, usually a pseudo classification.

Country Designation

Statistics tend to be overcounted for shipments to transshipment countries such as Hong Kong and the Netherlands and undercounted for other countries. Further, since the export statistics reflect the country of destination only as known to the exporter at time of shipment, the statistics will not reflect any further distributions of the merchandise made after the shipment leaves the United States.

Quantity

When the statistics disclose a particular company's shipments of a particular commodity to or from a specific country, it may be necessary to suppress quantity data. Similarly, when disclosure occurs on a world-wide basis, it may be necessary to suppress quantity data for shipments of one commodity to or from all countries.

Customs District

Statistics for two or more Customs Districts may be combined and published under an arbitrary designation or shipping weight may be excluded from an individual Customs District as a solution to disclosure situations. Consequently, statistics for individual ports may be understated due to the suppression of the weight of the affected commodities.

State Data

The term "Not Specified" represents instances where exporters have reported more than one state of origin or where the designation "US" has been reported. Transactions originating in a Foreign Trade Zone for which no number or State designation is reported also are included under "Not Specified".

Other designations are "Re-exports", "Estimated Shipments," and "Unreported". Those shipments designated as "Re-exports" (foreign exports) are exports having a foreign country as the point of origin. The "Unreported" designation includes those cases where either no state of origin was reported or an undecipherable abbreviation was reported. See the section entitled "Low-Valued Statistics" for a discussion of such shipments.

REVISIONS TO THE STATISTICS

Revisions to the import and export statistics occur in several ways.

Monthly, the aggregate import, export and trade balance figures as well as the "end-use" totals for the prior month are adjusted for carryover (data received and/or processed too late for inclusion in the proper month). These revisions will appear only in the Summary of U.S. Export and Import Merchandise Trade (FT 900).

Revisions to the import and export statistics in the form of errata are issued quarterly and are available free of charge upon request. These errata provide corrections to statistics issued in prior months' foreign trade reports. The data are presented by statistical month in commodity number arrangement only. The revisions are shown in commodity classification by country by Customs district order as net amounts to be added to or subtracted from the previously issued statistics. Shipments by all methods of transportation combined are reflected. There are no separate data for shipments by vessel or by air.

Annually, the Bureau of the Census publishes revised merchandise trade statistics for the prior year. These revisions include import and export data adjusted to eliminate carryover (that small portion of the monthly statistics that arrives too late for inclusion in the transaction month). Reflected also in these statistics are the application of quarterly errata and other corrections to the published monthly data.

The initial release of the statistics (FT 900) and certain reports include special announcements as warranted to call attention to the discovery of large or significant errors and to provide information on the appropriate data corrections and program changes.

The Census Bureau receives revisions from Canada, however, our process does not permit corrections to detail for data previously published. Therefore, the Bureau will make corrections for prior period transactions as changes to the cumulative-to-date total for U.S. exports to Canada.

Section 3

U.S. MERCHANDISE TRADE : Special Reports and Services

In addition to the sources of data described herein, the Census Bureau provides a special service whereby data users may obtain information in greater detail or different arrangement than that available in the statistics which are regularly released. The cost of the special work required to compile or duplicate the information from the basic data is charged to the subscriber. There is a wide range in the costs for Census Bureau data made available to users, depending on the methods used and other factors.

Foreign Trade Division (FTD) has implemented a number of improvements which provide quicker and better access to summary and detail trade data. These advancements include monthly data issued on compact discs (CD-ROM's) and various databases available on the local area network within FTD. These data sources have provided the means to create customized responses and special reports for data users and customers for nominal fees. A brief description of the services available follows:

NETWORK ACCESS TO COMPACT DISCS (CD-ROM'S)— HTSUSA and Schedule B Data

Special computer programs have been written to access the monthly CD-ROM's and are available on the FTD network for division staff to produce hard copy reports, computer files and electronic fax files. These reports emulate the discontinued microfiche products (IM145, IM146, and EM545). At any given time, the latest four statistical months' and year-to-date data are accessible. Since the CD-ROM's contain cumulative data, the December discs for the previous two years are also available. The following programs which provide "standardized" reports are provided:

IM145 U.S. General Imports (see figure 1). Presents harmonized TSUSA commodity by country of origin by customs district of entry. Quantity, customs, and c.i.f. values are provided. Vessel and air data are available. Current month and cumulative January to date.

IM146 U.S. Imports for Consumption. Presents harmonized TSUSA commodity by country of origin. Customs value and calculated duty are provided. Vessel and air data are available. Current month and cumulative January to date.

EM545 U.S. Exports of Domestic and Foreign Merchandise. Presents harmonized Schedule B commodity by country of destination by customs district

of exportation. Quantity, and f.a.s. value are provided. Vessel and air data are available. Current month and cumulative January to date.

Almost any other "customized" reports can be created using the data users requirements and specifications, and are also available on an individual fee basis from Trade Data Services Branch. Requests for reports from earlier discs (back to September 1989) will be handled by Branch staff upon request.

STANDARD INTERNATIONAL TRADE CLASSIFICATION (SITC) DATABASES

SITC databases and access computer programs have been developed and are available on the FTD network for division staff to produce hard copy reports, and computer files (See figure 2). The first SITC database provides all months of the current statistical year and year-to-date trade data. The second is the SITCYR database which provides annual original and revised data for several years.

The database access programs are written for the user to access immediately on a display screen or to generate printed listings or computer files. The programs allow the

user to create "custom" reports by selecting variable column headings. Reports can be generated using the following fields for any selected months or year-to-date:

U.S. Exports

Domestic f.a.s. value
Foreign f.a.s. value
Vessel value
Air value
Vessel shipping weight
Air shipping weight

U.S. General Imports

Customs value
C.i.f. value
Vessel value
Air value
Vessel shipping weight
Air shipping weight

The user may create a report for a specific country or countries, or for all countries for any of the one to five digits of the SITC. The reverse is also available. The user may create reports selecting any level of the SITC and then for any or all countries. This variable field and stub selection option in the program allows for many "custom" reports.

Figure 2. SITC Report

IN THOUSANDS OF DOLLARS		

Reports are available to data users on a fee basis from the Trade Data Services Branch. Data is available as hard copy printed reports or as computer files. Fax service is also an option for the data user.

End-Use Commodity Category Classification Databases

End-use commodity category classification databases and access computer programs have been developed and are available on the FTD network for division staff to produce hard copy reports, and computer files. The first

End-use database provides all months of the current and previous statistical years and year-to-date trade data (See figure 3). The second adds an option to generate a report for a specific country.

The database presents data for each month for the current statistical year and all months of the previous year. Year-to-date data is available for both years. The database access programs are written for the user to access immediately on a display screen or to generate printed listings or computer files. The programs allow the user to create "custom" reports by selecting variable column headings. Reports can be generated using the following fields for any selected months or year-to-date:

General imports customs or c.i.f. value
Exports f.a.s. value
Current dollars
Constant dollars
Actual month
Statistical month
Revised month
Seasonally adjusted data
Not seasonally adjusted data
Seasonal adjustment factors
Constant dollar deflators
End-use codes and descriptions

00000	Wheat	1,017,845	1,017,845
00010	Rice and other food grains	244,523	244,523
00100	Soybeans	1,452,123	1,091,191
00110	Other oilseeds and food oils	244,367	244,367
0200	Corn	1,953,742	1,953,742

Reports are available to data users on a fee basis from the Trade Data Services Branch. Data is available as hard copy printed reports or as computer files. Fax service is also an option for the data user.

U.S. Exports by State Database

A U.S. exports by state database and access computer program have been developed and are available to the Trade Data Services Branch staff to produce hard copy reports, and computer files. The program provides options to produce various "standardized" reports for annual data for years 1988 through 1990. The user may produce reports for exports from any or all states to any or all countries by two-digit SIC (See Figure 4). Various world area groupings are also available.

Figure 4. Exports by State Report

Page No. 1
06/25/91

U.S. Total Export From Vermont By Two-Digit SIC Code		
SIC Code	Description	Total Value (Dollars)
* Year: 1988		
09	FISH, FRESH OR CHILLED, AND OTHER MARINE PRODUCTS	7,921
08	FORESTRY PRODUCTS, NSFP	15,372
01	AGRICULTURAL PRODUCTS	49,610
29	PETROLEUM REFINING AND RELATED PRODUCTS	75,798
25	FURNITURE AND FIXTURES	176,180
91	SCRAP AND WASTE	733,722

In addition to the standardized reports, the Trade Data Services Branch staff can prepare any customized report for data users by using any combination of the State, country, or two-digit SIC variables.

Reports are available to data users on a fee basis from the Trade Data Services Branch. Data is available as hard copy printed reports or as computer files. Fax service is also an option for the data user.

U.S. Imports Databank Database (HTSUSA)

A computer program has been written to access the current and previous months imports databank database and is available on the FTD network for division staff to produce hard copy reports, computer files and electronic fax files. These reports are similar to the discontinued microfiche products (IM145, and IM146) (See Figure 5). The database also includes cumulative data. The following programs which provide "standardized" reports are provided:

IM145 U.S. General Imports Presents harmonized TSUSA commodity by country of origin by customs district of entry. Quantity, customs, and c.i.f. values are provided. Current and prior months and cumulative January to date.

IM146 U.S. Imports for Consumption Presents harmonized TSUSA commodity by country of origin. Customs value and calculated duty are provided. Current and prior months and cumulative January to date.

Reports are available to data users on a fee basis from the Trade Data Services Branch. Data is available as hard copy printed reports or as computer files. Fax service is also an option for the data user.

International Trade Administration COMPRO System

In order to provide historical and time series reports, the Trade Data Services Branch staff has been given access to the International Trade Administration's COMPRO main-frame computer system. Reports can be prepared for numerous series back to 1978, including HS, SITC, End-use, and SIC-based classification systems. Country and district level data are available, but method of transportation data are not.

Depending upon the data user's requirements for special reports, generating these reports can be very expensive. Reports are available to data users on a fee basis from the Trade Data Services Branch. Data is available as hard copy printed reports, or computer files. Fax service is also an option for the data user (See Figure 6).

Section 4.

U.S. Merchandise Trade: Catalog of Data Products

The data products of the U.S. merchandise trade statistics program are presented at many summary and detail levels. The statistics are released in publications, hard copy reports, compact disc, and computer tape (after 1991, no products are available on microfiche).

PUBLICATIONS AND HARD COPY REPORTS

Monthly

FT900 *U.S. Merchandise Trade*

This report presents the highly publicized import and export figures released by the Bureau of the Census each month about 45 days after the statistical month covered. It is available on a subscription basis and contains information on domestic and foreign exports and general imports of merchandise by selected country and selected commodity groupings with merchandise trade balance by month and cumulative January to date. Export and general import data are presented in the following exhibits:

- monthly text highlights,
- monthly and cumulative totals, seasonally adjusted, and not adjusted,
- by seasonally adjusted three-month moving averages,
- by principal end-use commodity category, seasonally adjusted,
- by individual principal end-use commodities, exports and imports, seasonally adjusted,
- by principal end-use commodity category, not seasonally adjusted,
- by petroleum and nonpetroleum end-use commodity totals,
- in 1987 constant dollars by end-use commodity category,
- for selected countries, economic and geographic areas, not seasonally adjusted,
- for crude petroleum and energy related petroleum products,
- by principal Standard International Trade Classification (SITC) commodity groupings,
- for advanced technology products.

A supplement is released one or two days after the FT900 release. Export and general import data are presented in the following exhibits:

- by Standard Industrial Classification (SIC) based commodity classification,
- by origin of movement of U.S. Exports by State,
- for crude petroleum by country, OPEC and Non-OPEC,
- by SITC commodity section totals,
- for countries, continent, and areas,
- for General Imports c.i.f. value

FT920 *U.S. Merchandise Trade: Selected Highlights*

Effective with data for December 1989, (annual 1989 totals) this hard copy monthly report became available on a subscription basis through the Foreign Trade Division. The report contains a series of tables which provide information on exports, general imports and imports for consumption. The tables include data on U.S. customs district and method of transportation, world area by country of origin and destination.

FT925 *Exports, General Imports, and Imports for Consumption, SITC-Rev.3 Commodity by Country*

This publication is issued monthly and is offered as a subscription through the Government Printing Office. Beginning with 1991, an annual edition will be issued which will include corrections to previously published data and eliminate "carry-over" (that portion of the monthly statistics that arrives too late for inclusion in the transaction month). This report presents both customs and c.i.f. value information for general imports and imports for consumption in terms of SITC commodity classification. Exports are presented using f.a.s. value, also in terms of SITC commodity classification.

Table 1 shows monthly and year-to-date value of exports, general imports, and imports for consumption by one-, two-, three-, four-, digit SITC commodity groupings. Table 2 presents monthly and year-to-date value of exports and general imports by five-digit SITC commodity by country.

TM985 U.S. Waterborne Exports and General Imports

This monthly printed report is available on a subscription basis through the Foreign Trade Division. The report presents information in terms of type of vessel service, U.S. coastal district, customs district and port, foreign trade areas, and flag of vessel. An annual version is also issued.

Annually**FT247 Imports for Consumption, 10-Digit HTSUSA by Country**

This publication is prepared annually and is issued through the Government Printing Office. The report presents imports for consumption data in customs value in terms of the Harmonized Tariff Schedule of the United States Annotated (HTSUSA), commodity classification. The sort for the report is HTSUSA commodity by country. Data for quantity and unit of quantity is provided.

FT447 Exports, 10-digit HS Schedule-B Commodity by Country

This publication is prepared annually and is issued through the Government Printing Office. The report presents exports f.a.s. value in terms of the Harmonized Schedule B commodity classification. The sort for the report is Schedule B commodity by country. Data for quantity and unit of quantity is provided.

FT895 U.S. Trade with Puerto Rico and U.S. Possessions

This report is prepared monthly and extracts are offered through the Foreign Trade Division. An annual publication is offered through the Government Printing Office. This report presents data on shipments to and from the United States and Puerto Rico and U.S. possessions. This report shows each territory by commodity, net quantity, value, vessel value and shipping weight, and air value and shipping weight information.

FT925 Exports, General Imports, and Imports for Consumption, SITC-Rev.3 Commodity by Country

See description above for Monthly Publications

FT927 Exports and General Imports, Country by Three-digit SITC-Rev. 3 Commodity

This annual publication began with the 1989 edition, and is offered through the Government Printing Office. This report presents customs value information for general imports in terms of the SITC commodity classification. Exports are presented using f.a.s. value also in terms of SITC commodity classification. The sort for table 1 is

country by three-digit SITC commodity. Table 2 contains exports by country by two-digit SITC, including vessel and air totals. Table 3 contains general imports by country by two-digit SITC, including vessel and air totals.

FT947 Exports and General Imports, Six-digit HS Commodity by Country

This annual publication began with the 1989 edition, and is offered through the Government Printing Office. This report presents both exports and general imports in the same tables. Data are presented for customs and c.i.f. value information for general imports in terms of the HTSUSA commodity classification. Imports for Consumption are presented for customs value. Exports are presented using f.a.s. value in terms of harmonized Schedule B commodity classification. The sort for the publication is six-digit HS commodity by country.

TA987 Vessel Entrances and Clearances

This annual printed report is available through the Foreign Trade Division. The report presents information by district and port for number of entrances and clearances, net registered tonnage, and flag (U.S. or foreign).

COMPUTER PRINTOUTS OF SELECTED FOREIGN TRADE COMMODITIES

The Foreign Trade Division makes available, on a subscription basis, monthly data in the form of computer-generated printouts of selected commodities from U.S. Import and Export trade reports. The cost is based on providing data in units of 1 to 10 commodity classification code numbers within each of the following formats.

IM145 *U.S. General Imports* Presents harmonized TSUSA commodity, country of origin, customs district of entry, quantity, customs and c.i.f. values. Current month and cumulative January to date.

IM146 *U.S. Imports for Consumption* Presents harmonized TSUSA commodity, country of origin, customs district of entry, quantity, customs value and calculated duty. Current month and cumulative January to date.

EM545 *U.S. Exports of Domestic and Foreign Merchandise* Presents harmonized Schedule B commodity, country of destination, customs district of exportation, quantity, and f.a.s. value. Current month and cumulative January to date.

MICROCOMPUTER COMPACT DISCS

Effective with the September 1989 statistics, monthly and cumulative year-to-date export and import commodity by country by district information is available on compact disc for use with microcomputers (CD-ROM Compact Disc-Read Only Memory). The CD-ROM discs are available on a subscription basis from Customer Services, Bureau of the Census, Washington, D.C. 20233 or call 301-763-4100. Beginning with the December 1990 discs, basic access software is included on each disc.

CDEX(yr-mo) U.S. Exports of Merchandise

This CD-ROM is produced monthly, approximately sixty days after the close of the statistical month. Each disc includes current month and cumulative year-to-date exports data. The following files are included on each disc:

Detail Database

For each HS commodity by country by district of exportation record, data are provided for country, commodity and district descriptions, number of records, quantity, unit of quantity, f.a.s. value, vessel shipping weight and value, and air shipping weight and value.

Commodity Summary Database

For each HS commodity, data are provided for commodity descriptions, number of records, quantity, unit of quantity, f.a.s. value, vessel shipping weight and value, and air shipping weight and value.

Country Summary Database

For each country, data are provided for country descriptions, number of records, f.a.s. value, vessel shipping weight and value, and air shipping weight and value.

District of Export Summary Database

For each district, data are provided for district of exportation description, number of records, f.a.s. value, vessel shipping weight and value, and air shipping weight and value.

Harmonized Commodity Masters, Export Concordance Database

This file is included to provide the concordances among the various merchandise trade classification systems, HS Schedule B (with alphabetical description), SITC code, end-use classification, Standard Industrial Classification code, and agriculture or non-agriculture product code.

Harmonized Commodity Masters, Commodity Descriptions

This file provides the international harmonized Schedule B code at the two, four, and six digit levels and their descriptions.

Harmonized Commodity Masters, SITC Descriptions

This file provides the SITC, Revision 3 codes at the 1, 2, 3, 4, and 5 digit levels and their descriptions.

Country Name Database

This file provides Schedule C country codes and their descriptions and abbreviations.

District Database

This file provides customs district codes and their descriptions and abbreviations.

CDIM(yr-mo) U.S. Imports of Merchandise

This CD-ROM is produced monthly, approximately sixty days after the close of the statistical month. Each disc includes current month and cumulative year-to-date import data. The following files are included on each disc:

Detail Database

For each HS commodity by country by district of entry and district of unloading record, data are provided for country, commodity and district descriptions, country sub-code, rate provision, number of records, quantity, unit of quantity, general imports and imports for consumption values (both customs and c.i.f.), import charges, vessel shipping weight and value, and air shipping weight and value.

Commodity Summary Database

For each HS commodity, data are provided for commodity descriptions, number of records, quantity, unit of quantity, general imports and imports for consumption values (both customs and c.i.f.), import charges, vessel shipping weight and value, and air shipping weight and value.

Country Summary Database

For each country, data are provided for country descriptions, number of records, quantity, unit of quantity, general imports and imports for consumption values (both customs and c.i.f.), import charges, vessel shipping weight and value, and air shipping weight and value.

District of Entry Summary Database

For each district, data are provided for district of entry description, number of records, dutiable value, calculated duty, general imports and imports for consumption values (both customs and c.i.f.), import charges, vessel shipping weight and value, and air shipping weight and value.

District of Unloading Summary Database

For each district, data are provided for district of unloading description, number of records, dutiable value, calculated duty, general imports and imports for consumption values (both customs and c.i.f.), import charges, vessel shipping weight and value, and air shipping weight and value.

Harmonized Commodity Masters, Imports Concordance Database

This file is included to provide the concordances among the various merchandise trade classification systems, HTSUSA (with alphabetical description), SITC code, end-use classification, Standard Industrial Classification code, and agriculture or non-agriculture product code.

Harmonized Commodity Masters, Commodity Descriptions

This file provides the international harmonized HTSUSA codes at the two, four, and six digit levels and their descriptions.

Harmonized Commodity Masters, SITC Descriptions

This file provides the SITC, Revision 3 codes at the 1, 2, 3, 4, and 5 digit levels and their descriptions.

Country Name Database

This file provides Schedule C country codes and their descriptions and abbreviations.

District Database

This file provides customs district codes and their descriptions and abbreviations.

U.S. MERCHANDISE TRADE MAGNETIC TAPES

All of the magnetic tapes below are sold as monthly or annual subscriptions through the Foreign Trade Division.

IM145 Data Bank *U.S. General Imports and Imports for Consumption*

The tape presents HTSUSA commodity code by country of origin by customs districts of entry and unloading. It includes the following data items: type, rate provision, quantity, shipping weight, method of transportation and separate value data (customs, c.i.f., import charges, dutiable value, and calculated duty). An annual IA245 is also available.

EM545 Data Bank *U.S. Exports of Domestic and Foreign Merchandise*

The tape presents Schedule B commodity code by country of destination by customs district of exportation. It includes the following data items: quantity, shipping weight, method of transportation and f.a.s. value data. An annual EA645 is also available.

EM595 *Shipments of Merchandise Between the United States and Puerto Rico and Shipments from the United States to the Virgin Islands*

This magnetic tape report contains current month total net quantity, value information, and value and shipping weight data for vessel and air shipments for each territory in commodity by customs district detail. There is also an annual EA695 magnetic tape prepared.

EXPORTS BY STATE/REGION/PORT MAGNETIC TAPES

EQ912 *U.S. Exports of Domestic and Foreign Merchandise by State*

This magnetic tape is produced quarterly and presents export data by State of exportation, by two-digit SIC commodity code, and country of destination. Data items provided are total value and separate value and shipping weight for vessel and air shipments, and value and shipping weight for containerized cargo. An annual tape EA917 is also produced.

EQ932 *U.S. Exports of Domestic and Foreign Merchandise by Region*

This magnetic tape is produced quarterly and presents export data by region of exportation by four-digit SITC, Revision 3 commodity code, by customs district and port of exportation, by country of destination. Data items provided are total value and separate value and shipping weight for vessel and air shipments, and value and shipping weight for containerized cargo. An annual tape EA937 is also produced.

EQ952 U.S. Exports of Domestic and Foreign Merchandise by Port

This magnetic tape is produced quarterly and presents export data by State of exportation, by customs district, by port of exportation, by country of destination. Data items provided are total value and separate value and shipping weight for vessel and air shipments, and value and shipping weight for containerized cargo. An annual tape EA957 is also produced.

TRANSPORTATION MAGNETIC TAPES

TM380 U.S. Waterborne General Imports and Inbound Intransit Shipments

This magnetic tape presents type of vessel service by U.S. customs port by foreign port by SITC commodity by country of origin (six-digit HTSUSA commodity is also provided). The following data items are provided: shipping weight, customs value, import charges, and percentage of containerized and noncontainerized cargo. This report also includes inbound intransit shipments.

TM780 U.S. Waterborne Exports and Outbound Intransit Shipments

This magnetic tape presents type of vessel service by U.S. customs port by foreign port by SITC commodity by country of origin (six-digit HS Schedule B commodity is also provided). The following data items are provided: shipping weight, f.a.s. value, and percentage of containerized and noncontainerized cargo. This report also includes outbound intransit shipments.

TM385 Monthly Vessel Entrances

Part 1. In alphabetical vessel name arrangement.

Part 2. In Customs district, port and manifest number arrangement.

This magnetic tape presents date, channel, vessel name, flag, type service, rig, net registered tonnage, type of cargo, type vessel, vessel code, draft, and serial number.

TM785 Monthly Vessel Clearances

Part 1. In alphabetical vessel name arrangement.

Part 2. In Customs district, port and manifest number arrangement.

This magnetic tape presents date, channel, vessel name, flag, type service, rig, net registered tonnage, type of cargo, type vessel, vessel code, draft, and serial number.

OTHER RELATED MERCHANDISE TRADE DATA PRODUCTS AND SOURCES

Trade and Employment Publication

This quarterly publication, which was started in the first quarter of 1984, measures the changes in U.S. imports and employment. U.S. export information was included in the publication beginning with the first quarter of 1987. The publication is a joint effort of the Bureau of Labor Statistics and the Bureau of the Census. The Bureau of the Census produces the publication by combining the employment data provided by BLS with the import and export data produced at the Bureau of the Census.

CENDATA™

CENDATA™ is an online data service offering the most current and widely used facts, specializing in press releases and information on ordering the latest data products. Foreign Trade Division puts the entire monthly U.S. Merchandise Trade Press Release and Supplement on CENDATA™. CENDATA™ is made available through cooperating private vendors, DIALOG and CompuServe, that provide nationwide access to information supplied by the Census Bureau through their own long-distance networks. Customers are billed for time used on the systems, but no extra charge is made for access to the census data. For additional information, contact Customer Services, Data User Services Division, Bureau of the Census, Washington, D.C. 20233 or call 301-763-4100.

The Economic Bulletin Board

The Department of Commerce's Economic Bulletin Board (EBB) provides personal computer users with fast, simple access to economic data and press releases prepared by the federal government.

Information on economic growth, inflation, monetary and fiscal policy, and foreign trade is regularly made available to EBB subscribers. Foreign Trade data files include:

1. U.S. Merchandise Trade Press Release and Supplement (FT900).
2. U.S. Merchandise Trade - 10-digit Harmonized Commodity totals by chapter (quantity, unit of quantity and value only are provided), country totals, and district totals.

Subscribers pay a low annual registration fee, which provides two hours of connect time on the EBB; thereafter, a low per-minute charge accrues. Billing is done quarterly by the National Technical Information Service (NTIS); for information on instant access to the EBB, call the NTIS at 703-487-4630.

For general information about the EBB, dial the EBB HelpLine: 202-482-1986. You can try out the EBB by dialing 202-482-3870 with your personal computer communications software and entering "Guest" when prompted for a user ID. Be sure to configure your communications software to 8-bit words, no parity, and one stop bit.

National Trade Data Bank

The National Trade Data Bank (NTDB) provides analysts and policymakers with the best of the trade and export promotion data from 15 federal agencies. Established by the Omnibus Trade and Competitiveness Act of 1988, the NTDB is the result of the Trade Act's charge to the Secretary of Commerce and other federal agencies to assemble economic, demographic, social, and other statistics of the United States and other countries that are of use to "business firms that are engaged in export-related activities and to Federal and State agencies that promote exports."

The data series in the NTDB include merchandise trade import and export data from the Bureau of Census; the complete text of the CIA World Factbook; U.S. international transactions data, and the quarterly National Income and Product Accounts, prepared by the Bureau of Economic Analysis; exchange rates, and foreign interest rate data, compiled by the Federal Reserve Board; international labor and price statistics, compiled by the Bureau of Labor Statistics; the complete text of the International Trade Administration's publications "Understanding U.S. Foreign Trade" and "European Community 1992 Analysis," as well as the data tables from the U.S. Industrial Outlook; and many other data files, which comprise more than 600 megabytes of information—enough to fill over 1,500 floppy diskettes.

The NTDB will be continually updated and distributed each month on one optical disc, known more commonly as a CD-ROM. Each monthly disc contains the complete data base, and includes user-friendly software that will make locating, extracting, and printing NTDB data a fast, simple process.

The NTDB CD-ROM can be used on an IBM-compatible personal computer equipped with a minimum of 512K of memory, and ISO 9660 CD-ROM reader, and the Microsoft CD-ROM DOS extension (version 2.0 or higher). The NTDB software will support a color monitor and mouse.

A 12-issue annual subscription to the National Trade Data Bank CD-ROM is \$360, and can be arranged through the National Technical Information Service (NTIS) at 703-487-4630. Mention the NTIS publication number PB90-59174LEP. Single copies of the most recent NTDB CD-ROM are available for \$35, and may be ordered from NTIS at 703-487-4650. Mention the NTIS publication number PB90-502345LEP.

Although the principal means of distribution of the NTDB is through CD-ROMs, NTDB data may also be obtained on magnetic tape and by electronic transfer from the NTDB mainframe computer. For more information on this "NTDB Premium Service," contact NTIS at 703-487-4630.

For more information on the NTDB, please call the U.S. Department of Commerce, Office of Business Analysis at 202-482-1986.

Special Reports and Services

Foreign Trade Division (FTD) has implemented a number of improvements which provide quicker and better access to summary and detail trade data. These advancements include monthly data issued on compact discs (CD-ROM's) and various databases available in the FTD. These data sources have provided the means to create customized responses and special reports for data users and customers for nominal fees. Please contact FTD at the above address for more details.

NOTE: The petroleum products aggregated in the end-use commodity classification system include virtually the same energy related petroleum products as those aggregated in the SITC. The end-use petroleum products, however, include some products such as ethane, butane, benzene and toluene, which are included in 'Manufactured Goods'.

Exhibit 4. Exports and Imports by Principal End-Use Commodity Category: January 1991 to November 1992

In millions of dollars. Details may not equal totals due to seasonal adjustment and rounding. (R) - Revised.

(1)

Developed Countries - Australia, Canada, Japan, New Zealand, South Africa, and Western Europe.

Developing Countries - Rest of the world except Eastern Europe and Selected Asia countries.

Eastern Europe and New Republics - Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania, USSR, Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Selected Asia - China, Mongolia, North Korea, Vietnam.

Asia Near East - Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syrian Arab Republic, United Arab Emirates, Yemen.

Asia - NICs - Hong Kong, Singapore, South Korea, Taiwan.

Asia - SOUTH - Afghanistan, Bangladesh, India, Nepal, Pakistan, Sri Lanka.

ASEAN - Brunei, Indonesia, Malaysia, Philippines, Singapore, Thailand.

Western Europe - Andorra, Austria, Belgium, Bosnia-Herzegovina, Croatia, Cyprus, Denmark, Faroe Islands, Finland, France,

Germany, Gibraltar, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta and Gozo, Macedonia,

Monaco, Netherlands, Norway, Portugal, San Marino, Slovenia, Spain, Svalbard Jan Mayen Island, Sweden, Switzerland, Turkey,

United Kingdom, Vatican City, Yugoslavia.

INFORMATION

COVERAGE

The data in this release--

- A. Include government and non-government shipments of merchandise.
- B. Reflect the movement of goods to and from foreign countries into and out of the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands and U.S. Foreign Trade Zones.
- C. Exclude (1) shipments between U.S., Puerto Rico, the U.S. Virgin Islands, and U.S. possessions, (2) shipments to U.S. Armed Forces and diplomatic missions abroad for their own use, (3) U.S. goods returned to the U.S. by its Armed Forces (4) personal and household effects of travelers and (5) in-transit shipments.
- D. Reflect the total arrival of merchandise from foreign countries that immediately entered consumption channels, warehouses or Foreign Trade Zones (*General Imports*).

TIMING ADJUSTMENTS AND REVISION POLICY

Monthly

A small portion of the monthly statistics arrives too late for inclusion in the transaction month. Therefore, monthly data include actual month's transactions as well as a small number of transactions for previous months. The Census Bureau revises the aggregate seasonally adjusted (current and constant dollar) and unadjusted export, import and trade balance figures, as well as the End-use totals for the prior month.

SITC and country detail data are not revised monthly. The timing adjustment shown in Exhibits 12 and 13 is the difference between monthly data as originally reported and as recompiled.

Periodic

Large revisions to prior month data that significantly affect the trade balance are made in the year-to-date totals in any given monthly press release, with appropriate explanation in the text. All exhibits are subject to correction.

Annual

Each year the import, export, and trade balance figures are revised to reflect corrections received subsequent to the monthly revision. Final revisions by month for 1991 were released on May 13, 1992. These revisions were reflected in totals, End-use, SITC and country summary data.

VALUATION

Import data are Customs value, except where C.i.f. value is indicated. Export data are f.a.s. value. They are explained below:

1. *Customs Import Value* - U. S. Customs Service appraised value of merchandise; generally, the price paid for merchandise for export to the U.S. Import duties, freight, insurance, and other charges incurred in bringing merchandise to the U.S. are excluded.
2. *C.i.f. Import Value* - Customs value (defined above) plus freight, insurance and other charges (excluding U. S. Import duties) incurred in bringing merchandise from the exporting country to the first port of arrival in the United States.
3. *F.a.s. Export Value* - free alongside ship value of merchandise at the U.S. port of export, based on transaction price including inland freight, insurance and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

U.S./CANADA DATA EXCHANGE AND SUBSTITUTION

The data shown in this release for U.S. exports to Canada are derived from import data compiled by Canada. Canadian export data, on the other hand, are derived from import data compiled by the United States. Substitution of Canadian import data for U.S. export data provides for a more reliable export measure and reduces the reporting burden on the U.S. exporting community.

The use of Canada's import data to produce U.S. export data requires several alignments in order to compare the two series.

1. *Coverage*--Canadian imports are based on country of origin. U.S. goods shipped from a third country are included. U.S. exports exclude these foreign shipments. For May 1992, these shipments totalled \$27 million.
2. *Valuation*--Canadian imports are valued at point of origin in the U.S. However, all U.S. exports are valued at the port of exit in the U.S. and include inland freight charges, making the U.S. export value slightly larger. Canada requires inland freight to be reported. When it is not, an estimate of 4.5 percent is used. Inland freight charges for May 1992 account for 4.8 percent of the value of U.S. exports to Canada.
3. *Reexports*--U.S. exports include reexports of foreign goods. Again, the aggregate U.S. export figure is slightly larger. For May 1992, reexports to Canada were \$527 million.
4. *Exchange Rate*--Average monthly exchange rates are applied to convert the published data to U.S. currency. For May 1992, the average exchange rate is 1.1991.
5. *Other*--There are other minor differences which are statistically insignificant, such as rounding error.

COMMODITY INFORMATION

Adjusted for Seasonal and Working-Day Variations

Commodities exported and imported are initially classified under the Harmonized System (HS). This system describes and measures the characteristics of commodities traded. Combining trade into approximately 140 export and 140 import end-use categories makes it possible to examine commodities according to their principal uses (See Exhibits 5 and 6). These categories are used as the basis for computing the seasonal and working-day adjusted data. Imports of petroleum and petroleum products are adjusted for the length of the month. These adjusted data are then summed to the six end-use aggregates for publication (Exhibits 4 and 8). These data are provided to the Bureau of Economic Analysis (BEA) for use in the National Income and Product Accounts (NIPAs). The BEA supplements these data in the NIPAs with quarterly adjustments for six of the end-use categories which exhibit seasonality on a quarterly basis but not on a monthly basis. Because of the extremely variable movements of the data series for aircraft, users studying data trends may wish to analyze aircraft separately from other trade.

The seasonally adjusted three-month moving averages shown in Exhibit 2 are computed by summing the subject month, the two prior months, dividing by 3 and plotting at the subject month.

The seasonal adjustment procedure is based on a model, which estimates the monthly movements as percentages above or below the general level of each end-use commodity series (unlike other methods that redistribute the actual series values over the calendar year). As a result, the sum of the seasonally adjusted monthly totals will differ slightly from the unadjusted calendar year total.

Adjusted for Price Change

Data adjusted for seasonal variation on a constant dollar basis (1987=100) are presented in Exhibits 7 and 8. This adjustment for price change is done at the lowest end-use level possible, then summed to the six published end-use aggregates. The deflators are primarily based upon the monthly price indexes published by the Bureau of Labor Statistics using techniques developed for the National Income and Product Accounts by the Bureau of Economic Analysis.

Not Adjusted for Seasonal Variations

Commodity data appearing in Exhibit 13 are classified in terms of the Standard International Trade Classification (SITC) Revision 3. Data are arranged by principal commodity groupings.

Agricultural commodities consist of non-marine food products and other products of agriculture which have not passed through complex processes of manufacture, such as raw hides and skins, fats and oils, and wine. A few commodities such as essential oils, starches, casein, and albumin, considered to be agricultural by the U.S. Department of Agriculture, have been excluded from agriculture commodities and are included in manufactured goods where they are classified in the SITC.

Manufactured goods conform to the SITC sections that include chemicals and related products, N.S.P.F.; manufactured goods classified chiefly by material; machinery and transport equipment;

miscellaneous manufactured articles, N.S.P.F.; and commodities and transactions not classified elsewhere.

Reexports are foreign merchandise entering the country as imports and which at the time of exportation are in substantially the same condition as when imported. Reexports, included in overall export totals, appear as separate line items in Exhibit 13.

Advanced Technology Products (ATP)

About 500 of some 22,000 commodity classification codes used in reporting U.S. merchandise trade are identified as "advanced technology" codes and they meet the following criteria:

1. The code contains products whose technology is from a recognized high technology field (e.g., biotechnology).
2. These products represent leading edge technology in that field.
3. Such products constitute a significant part of all items covered in the selected classification code.

The aggregation of the commodities results in a measure of advanced technology trade which appears in Exhibit 14. This product and commodity-based measure of advanced technology differs from broader SIC industry-based measures which include all commodities produced by a particular industry group, regardless of the level of technology embodied in the commodities.

IM-146A

Imports for Consumption (U.S. Goods Returned)

This report provides data on domestic goods that are shipped from the United States to other countries for processing and/or assembly and then returned to the United States. The report provides data on eight special import programs that are not available in other data reports or products. Data for this report is presented by Customs value in terms of the Harmonized Tariff Schedule of the United States, Annotated (HTSUSA) commodity classification. The sort for this report is a special import program by HTSUSA commodity-by-country. The report provides current month and year-to-date data for quantity, U.S. value, dutiable value and total value. The IM 146A is prepared monthly and extracts from this report are offered through the Foreign Trade Division.

Section 6

Foreign Trade Products Available on CD-ROM

The entire monthly Foreign Trade data base is available on a commodity-by-country-by-customs district basis on compact disc for use with microcomputer (CD-ROM Compact Disc - Read Only Memory). Each monthly disc contains current month data as well as year-to-date information on each commodity.

Foreign Trade Division has also made available on a CD-ROM disc U.S. Exports Commodity Classification Schedule B. This new reference CD-ROM will help data users find

the Schedule B commodity classification and exact description of data products. The disc has user-friendly software which allows you quickly access the commodity number from commonly used names or key words in the description of your product.

All CD-ROM products are available from Customer Services Division, Bureau of the Census, Washington, DC 20233.

Abstract

U.S. Exports of Merchandise on CD-ROM
[machine-readable data file] / prepared by the Bureau
of the Census. —Washington: The Bureau [producer
and distributor], 1990.

Type of File:

Summary statistics.

Universe Description:

The universe is reported U.S. export statistics, both government and nongovernment shipments, of domestic and foreign merchandise (including non-monetary gold and silver) from the U.S. Customs districts (the 50 states, District of Columbia and Puerto Rico), U.S. Foreign Trade Zones, and the U.S. Virgin Islands to foreign countries.

Subject-Matter Description:

The file provides U.S. exports of domestic and foreign merchandise by Harmonized Schedule B Commodity Code. It contains quantity, value, and shipping weight by country of destination, customs district of exportation, and method of transportation.

Smaller files provide totals for commodity, country of destination, and U.S. Customs districts of exportation.

These data are provided for current month and year-to-date.

Geographic Coverage:

Data are provided for Customs districts of exportation.

Technical Description:

File Structure: dBase III format. There are 9 database files and 10 index files. The database and index files provide information about detailed exports as well as information about commodities, countries, districts of exportation, and the Harmonized Commodity Description and Coding System (HS). Further details on

these files are provided in Chapter IV of the technical documentation, Files on CD-ROM.

Reference Materials:

U.S. Exports and Imports of Merchandise on CD-ROM Technical Documentation One copy accompanies each order. Additional copies are available for \$5 from Customer Services, Bureau of the Census, Washington, DC 20233.

Related Printed Reports:

U.S. Merchandise Trade (FT 900 and Supplement). This report presents U.S. export data on a free-alongside-ship (f.a.s.) value basis and provides general import data both on a customs value and cost, insurance, freight (c.i.f.) value basis. Total exports, imports, and merchandise trade balances are shown for each month of the current and preceding calendar years. This monthly report is available from the Foreign Trade Division, Bureau of the Census, Washington, DC 20233. The cost is \$10 per month or \$120 for an annual subscription. Portions of the report are available on CENDATA™, the Census Bureau's online information service.

U.S. Merchandise Trade: Exports, General Imports, and Imports for Consumption SITC Commodity by Country (FT 925). This publication presents both customs and c.i.f. value information for general imports and imports for consumption in terms of Standard International Trade Classification (SITC) commodities. The publication also shows f.a.s. value for SITC commodity exports. It includes both current month and year-to-date information. SITC commodity by country information is shown for those countries where the average monthly value of each SITC commodity for either exports or imports based on the year-to-date value is \$50,000 or more.

Related Public Domain Software:

The Census Bureau has placed various software that can be used with CD-ROM's in the public domain. This software is available to users from the following two sources:

- The Census Bureau's electronic bulletin board. You may access the bulletin board using your modem on (301) 763-1568. For information, the voice grade telephone number is (301) 763-1580.
- The CD-ROM Software Clearinghouse at the University of Tennessee. For information contact:

Institute for Electronic Data Analysis
Department of Marketing, Logistics
and Transportation
316 Stokley Management Center
University of Tennessee
Knoxville, Tennessee 37996

Phone (615) 974-5311

File Availability:

The CD-ROM may be ordered from Customer Services using the order form in Appendix A. The subscription rate for monthly releases from January to December is \$1200 per year. The introductory subscription for September - December 1989 data files is \$400. Individual CD-ROM's cost \$150.

FILES ON CD-ROM

Abstract

U.S. Imports of Merchandise on CD-ROM

[machine-readable data file] / prepared by the Bureau of the Census. —Washington: The Bureau [producer and distributor], 1990.

Type of File:

Summary statistics.

Universe Description:

The universe is reported U.S. import statistics, including both government and nongovernment shipments of merchandise into the U.S. Customs Territory (the 50 states, District of Columbia and Puerto Rico), U.S. Foreign Trade Zones, and the U.S. Virgin Islands from foreign countries.

Subject-Matter Description:

The file provides net quantity, value data (all methods of transportation combined), value and shipping weight data for vessel and air shipments in terms of commodity by country of origin, by customs district of entry, by customs district of unloading, and by rate provision.

Smaller files provide totals for each commodity, totals for each country of origin, and totals for each customs district of entry and customs district of unloading.

These data are provided for current month and year-to-date.

Geographic Coverage:

Data are provided for countries of origin and customs districts of import for current month and year-to-date.

Technical Description:

File Structure: dBase III format. There are 10 database files and 11 index files. The database and index files provide information about detailed imports as well as information about commodities, countries, districts of entry, districts of unloading, and the Harmonized Commodity Description and Coding System

(HS). Further details on these files are provided in Chapter IV of the technical documentation, Files on CD-ROM.

Reference Materials:

U.S. Exports and Imports of Merchandise on CD-ROM Technical Documentation. One copy accompanies each order. Additional copies are available for \$5 from Customer Services, Bureau of the Census, Washington, DC 20233.

Related Printed Reports:

U.S. Merchandise Trade (FT 900 and Supplement). This report presents U.S. export data on a free-alongside-ship (f.a.s.) value basis and provides general import data both on a customs value and cost, insurance, freight (c.i.f.) value basis. Total exports, imports, and merchandise trade balances are shown for each month of the current and preceding calendar years. This monthly report is available from the Foreign Trade Division, Bureau of the Census, Washington, DC 20233. The cost is \$10 per month or \$120 for an annual subscription. Portions of the report are available online through CENDATA™, the Census Bureau's online information service.

U.S. Merchandise Trade: Exports, General Imports, and Imports for Consumption SITC Commodity by Country (FT 925). This publication presents both customs and c.i.f. value information for general imports and imports for consumption in terms of Standard International Trade Classification (SITC) commodities. The publication also shows f.a.s. value for SITC commodity exports. It includes both current month and year-to-date information. SITC commodity by country information is shown for those countries where the average monthly value of each SITC commodity for either exports or imports based on the year-to-date value is \$50,000 or more.

FILES ON CD-ROM

U.S. Imports of Merchandise on CD-ROM

These files are in dBase III format. There are 10 database files and 11 index files. The index files pertain to the database files as they are shown below. To access each index, use the key listed with the index.

ACKNOWLEDGEMENTS

This technical documentation was prepared within the Data Access and Use Staff, under the direction of Deborah D. Barrett, Chief, Patricia O. Fuellhart, Chief of its Technical Information Section. Ruby Lewis was coordinator for this document. James Clark of the Systems and Programming Branch provided technical support. Word processing support was provided by Sylvia Nowlin. Technical assistance was provided by Michael Farrell, Milton Kaufman, George Tormey, and Charles Woods of the Foreign Trade Division.

The file should be cited as follows:

U.S. Exports and Commodity Classification CD-ROM
User's Guide [machine-readable data file] / prepared
by the Bureau of the Census. -Washington: The
Bureau [producer and distributor], 1992.

Questions about the CD-ROM should be directed to Data User Services Division, Systems and Programming Branch, Bureau of the Census, Washington, DC 20233. (301) 763-4677.

Questions about the subject matter should be directed to Foreign Trade Data Services Branch, Bureau of the Census, Washington, DC 20233. (301) 763-5140.

U.S. EXPORTS COMMODITY
CLASSIFICATION
CD-ROM USER'S GUIDE

WHY COMMODITY CLASSIFICATION CD-ROM?

Let's look at two different scenarios.

Here is a classic problem for a shipper filling out some required paperwork for the government (probably a Shippers Export Declaration form). It's almost quitting time and you have to put a commodity code on this shipment classifying what kind of product your company is exporting. You know that the commodity code number for the product must be somewhere in some code book or manual that the government has. Oh no! Not that thick Schedule B publication. There are over 8,000 commodities and code numbers listed in there and more being added every year. You know you're not going to find that one code number among all those pages and numbers in time to make your deadline for submitting the forms.

Switch scenes now to the shipper's office that has the U.S. Exports Commodity Classification CD-ROM. You type "GO" at the prompt for your CD-ROM drive; up pops the title screen and then the search screen; type the name of the product and you should get a list of possible codes to scroll through and pick. Doesn't sound too hard, now does it? In the following pages we will show you a little more about the software and its features. We will briefly describe the basic functions and provide some hints on how to search for your commodity number.

INTRODUCTION

The U.S. Exports Commodity Classification CD-ROM was designed to assist our users in quickly finding a 10-digit Schedule B number to a particular product. You may be a shipper as in the above example and need to properly classify export products or you may be a market researcher and need to find a particular product code in order to access information on the trading of that product. This CD-ROM should help both kinds of users reach their goals.

WHAT'S ON THIS CD-ROM?

Basically, there are two things on this CD-ROM—a data base of export commodity codes and product descriptions and search software to help in locating the code that you need. Since someone always wants to know exactly what's on the disc, Appendix A lists the files for you.

In case you are not familiar with the way export commodities are classified, there is a system called the Schedule B or Statistical Classification of Domestic and Foreign Commodities Exported from the U.S. The current system has been in effect since the adoption in 1989 of the Harmonized Commodity Description and Coding System (Harmonized System). This system consists of 97 chapters grouped into 22 sections. Chapters 1 through 97 correspond to the international system (Chapter 77 is blank) and Chapter 98 is used for special classification provision exports. The first two digits represent the chapter in which a commodity is classified. The first four digits represent the heading in that chapter. The first six digits represent the Harmonized System code or subheading. The next four (seventh through tenth) digits represents the most detailed statistical subdivision.

The system is not static in that as new kinds or variations of products are exported new commodity codes may be assigned. A sample of the data base follows starting with the 2 digit chapter and progressing down to the 10-digit commodity.

Chapter 84. Nuclear Reactors, Boilers, Machinery and Mechanical Appliances; Parts Thereof

8471-Automatic data processing machines and units thereof; magnetic or optical readers, machines for transcribing data onto data media in coded form and machines for processing such data, not elsewhere specified or included:

8471100000-Analog or hybrid automatic data processing machines.

847120-Digital automatic data processing machines, containing in the same housing at least a central processing unit and input and output unit, whether or not combined:

With cathode-ray tube (CRT):

8471200030-Color

8471200060-Other

8471200090-Other

The software used to build the indexes and perform the retrieval operations is QUESTAR, a copyrighted product of Publishers Data Service Corporation (PDSC). As you use the system, references to Questar will appear in such places as when using the "HELP" functions. The software has numerous features associated with it, some of which, such as graphics, are not suitable for this application. Instructions in this document will mainly pertain to the

Search functions. We will present a brief overview of the other functions that will appear on your screen, but will not go into great detail in this booklet in describing their many uses. You may want to explore these functions using Questar's "HELP" feature that is associated with every specific function.

GETTING STARTED

For most users, no special installation is necessary. Place the CD-ROM in a properly installed CD-ROM reader, change the current MS-DOS drive to the CD-ROM drive letter, and type go.

If you are one of the small number of users who has a computer system that requires custom installation, follow the instructions noted above, but type install. The instructions on the screen will guide you through the installation.

To use software that has been copied to your hard disk through custom installation, change the current MS-DOS drive to your hard disk drive letter, change to the QUESTAR directory, and type questar eclass.

THE SEARCH SCREEN

There are two main screens that we will describe in this booklet. The Search screen in Figure 1 on the next page is the first one users encounter. The second one is the Match List screen. As shown in Figure 1, the search screen is divided into four areas: the status box at the very top, the menu bar just underneath the status box, the center window where you enter the key word search entry, and the help line bar on the bottom of the screen that lists the function keys.

(See text)

Figure-1

The [F2] key is the main key you use to move between the menu bar and center window and vice-versa. You will use this key extensively in your operations. The [Esc] key may be used to return to the previous screens or click the right mouse button.

Although you can perform most of your searches through the pull-down items on the menu bar, you can perform many common functions using the function keys listed on the Help Line Bar. There are three ways to know which function keys are available in a given context. First the pull-down menu options that also have function keys assigned have that information in the menu. For example, in the search screen menu option "Perform Search [F4]" indicates that pressing

[F\$] anywhere in the search screen performs a search. This key assignment is retained throughout the search screen, but it changes when you go to a different screen.

Another source of function key information is the help line bar, which is at the bottom of each screen. It shows several of the most useful keys in the current context of your operation. Note that if you are using a mouse, you can click on the help bar line to perform any of the functions given. The last source of function key information is the system help, which can be viewed by pressing the [F1] key twice. A quick overview of these keys follows:

```
F1  HELP
F2
F4  PERFORM SEARCH
F6  NEXT ITEM
F8  PREVIOUS ITEM
F10 EXPRESS SEARCH
```

The menu bar at the top of the Search screen provides the following options for word searching and browsing: Search, Search Assist, Search History, Preferences, and System Info. The Search pull-down menu has the following options.

Search Provides for word searching and browsing

Option	Function Key	Description
Enter	F2	Activates the search
Perform Search	F4	Performs a search using the current query
Shows Matches	F4	Builds a match list from the word search
Express Search	F10	Performs a search using the current query
Clear Search	Alt + F2	Allows you to clear the current search
Search Info	-	Displays information about the last search results
Browse	Alt + F4	Builds a match list for the entire database

Search History Provides functions for saving and reissuing searches

Option	Function Key	Description
Load Search History	-	Allows you to load a saved search history.
Save Search History	-	Allows you to save the search history to a file

Clear Search History	-	Allows you to initialize the search history.
Save Search to	-	Allows you to save the current search into the history
History		
Recall Search from		Allows you to recall a previously saved search history

Preferences Provides preferences for automatically creating match lists, saving searches in the search history, and selecting the search assist features (i.e. Thesaurus, Depluralization, and Equivalents)

System Info Provides a function for displaying information about current Questar status.

ACTUALLY SEARCHING FOR A PRODUCT

There are two ways to search for a product: The 6-digit harmonized code (6 DIGIT CODE SEARCH) or description of the product (KEY WORD SEARCH)

6-DIGIT CODE SEARCH

To use the 6-digit search, enter the 6-digit code in the box 6-DIGIT SCH-B CODE. Press the F4 function key to locate the 10-digit Harmonized reference associated with the 6-digit code. The total number of references will appear in the top left-hand corner of the screen. Press F4 to display the first reference and press F6 for subsequent reference.

KEY WORD SEARCH

DO NOT enter anything in the 6-digit code field. Arrow down to the block that reads Commodity Description.

Searching may be performed on a single word, a partial word or multiple words. You can also check to see if a word is included in the commodity description.

Single Word Simply type the word you are looking for (e.g. computer) and press the F4 key. Look at the upper left-hand of the screen to see how many references you have found. Press F4 to view what you have found, and continue to press F6 for multiple occurrences.

Partial Word If you are not sure how a word is spelled, or

if it is singular or plural, type as much of the word as you like followed by an Asterisk (*): e.g. COMPUTER* will locate all reference to COMPUTER or COMPUTERS. COM* will locate all words beginning with the letters COM such as communication, computer, computers, etc.

Multiple Words It is usually best to narrow a search as much as possible. For example, if you type the word STEEL you will find over a thousand references. Rather than look at all of them, try to narrow the search. STEEL PIPE would furnish you only the reference to steel pipe. You can further narrow the search by typing STEEL PIPE GALV*. This would find all description references having the words GALVANIZED, STEEL and PIPE.

Operands (And, Or, Not) For a straight multiple word search, the AND is assumed and does not need to be specified. STEEL PIPE is sufficient, no 'AND' is needed. The operand OR and NOT can be used. STEEL NOT PIPE would produce all reference to STEEL not containing the word PIPE. STEEL OR PIPE would produce all references containing either the word STEEL or PIPE, such as plastic pipe.

Help in Finding Words

QUESTAR has a feature to help you in searching for products. If you want to see if a word is included in the index, type a few characters of a word in the description search box and press the INS key. For example, by typing COM and pressing the INS key, all words beginning with COM will be listed. Arrow down to the one you want, press Enter and the word will be transferred to the search block. Proceed as with a normal search by pressing F4.

General Operation

You can use the match list screen to select records for displaying and saving to disk. The match list displays a list of the groups that contain records matching your search.

To select a record for display first activate the match list by selecting the EXAMINE MATCH LIST menu option, pressing the menu/window key [F2], or clicking on the match list with the left mouse button. Note that the match list is activated automatically when you enter the match list screen.

You can browse through the match list in three ways. The most basic is to browse using [PgDn]. If you wish to search for a group name that has a specific text pattern, select the PATTERN SEARCH menu option or press [Control] + [F4]. Finally, you can find a group name that begins with a specific pattern by simply typing in that pattern.

MATCH LIST SCREEN

(See text)
Figure-2

Once you have highlighted the group you want to display, press the action key [F4]. Questar then displays the first matching record in the selected group in the data screen.

(See text)

(See text)

Match List Provides functions for match list handling.

Option	Function Key	Description
Examine Match List	[F2]	Activates the match list.
Save Match List		Allows you to save the current match list to a file.
Load Match List	-	Allows you to load a previously saved match lists
Merge Match List	-	Allows you to merge together two match lists.
Delete Marked Groups	-	Allows you to delegate groups from the match list.
Keep Only Marked Groups	-	Allows you to delegate groups from the match list
Pattern Search		Provides functions for match pattern searching.

Option	Function Key	Description
Pattern Search	[Ctrl] + [F4]	Allows you to search quickly for a group name.

Next Pattern Match	[Ctrl] + [F6]	Searches forward for the next matching group.
Prev Pattern Match	[Ctrl] + [F8]	Searches backward for the previous matching group.
Preferences		Provides functions for setting the match list display order.
System Info		Provides a function for displaying information about current Questar status.
Command Summary		
File		Provides functions for record saving and printing and DOS shell creation.
Option		
Save Records to File	-	Allows you to write all the records in the current match to a file.
Print Records	-	Allows you to print all the records in the match list.
DOS Shell	[Shift] + [F1]	Creates a DOS shell.
Exit Program	[Alt] + [F10]	Allows you to exit the program.

DESCRIPTION OF FIELDS FOR IMPORTS DATA BANK

<u>FIELD NUMBER</u>	<u>FIELD NAME</u>	<u>FIELD ABBREVIATION</u>	<u>DESCRIPTION OF FIELDS</u>
3	HCC	HCC	Harmonized Classification Code
4	COUNTRY	CTRY	Country Code
5	COUNTRY SUB CODE	CSC	Country Sub Code: 0 = Country of Origin 1 = Country of Shipment 4 = GSP Item Generalized Systems of Preference 9 = Caribbean Basin Initiative Item B = APTA Automotive Products Trade Act C = Agreement on Civil Aircraft I = Israel Free Trade Agreement X = Canada Free Trade Agreement Z = Compact of Free Association Act
6	DISTRICT OF ENTRY	DE	District Code where merchandise entered the United States.
8	DISTRICT OF UNLOADING	DU	District Code where item taken off carrier.
10	RATE PROVISION	RP	Rate Provision Code (Guide to Foreign Trade Statistics)
30	CONSUMPTION CIF	CONS-CIF	Consumption cost, insurance and freight.
33	STATISTICAL MONTH	SM	Month data got into statistics.
53	CONSUMPTION QUANTITY 1	CONS-QTY-1	Consumption first unit of quantity.
54	CONSUMPTION VALUE	CONS-VALUE	Consumption Customs Value.
55	CONSUMPTION QUANTITY 2	CONS-QTY-2	Consumption second unit of quantity.
56	DUTIABLE VALUE	DUTY-VALUE	Customs Value subject to Duty.

<u>FIELD NUMBER</u>	<u>FIELD NAME</u>	<u>FIELD ABBREVIATION</u>	<u>DESCRIPTION OF FIELDS</u>
57	CALCULATED DUTY	CAL-DUTY	Estimated Duty
58	GENERAL QUANTITY 1	GEN-QTY-1	General first unit of quantity.
59	GENERAL VALUE	GEN-VAL	General Customs Value.
60	GENERAL QUANTITY 2	GEN-QTY-2	General Second Unit of Quantity.
61	VESSEL SHIPPING WEIGHT	VESSEL-SWT	Vessel Shipping Weight.
62	VESSEL CUSTOMS VALUE	VESSEL- CUSTOMS-VALUE	Vessel Customs Value.
63	AIR SHIPPING WEIGHT	AIR-SWT	Air Shipping Weight.
64	AIR CUSTOMS VALUE	AIR-CUSTOMS- VALUE	Air Customs Value.
65	CARD COUNT	CARD-COUNT	Number of detailed records making this summation record.
67	CONSUMPTION CHARGES	CONS-CHRG	Consumption charges (Insurance and freight).
70	GENERAL CHARGES	GEN-CHRG	General Charges (Insurance and freight).
71	GENERAL CIF	GEN-CIF	General cost, insurance and freight.
73	VESSEL CHARGES	VESSEL-CHRG	Vessel Customs Charges (Insurance and freight).
75	AIR CHARGES	AIR-CHRG	Air Customs Charges (Insurance and freight).

1989 - 1990

DESCRIPTION OF FIELDS FOR EXPORTS ANNUAL DATA BANK

<u>POSITION</u>	<u>FIELD NAME</u>	<u>DESCRIPTION OF FIELD</u>
1	D/F	1 - Domestic 2 - Foreign
2	NOT USED	Not used, field is blank.
3-12	COMMODITY NUMBER	Harmonized Commodity Code.
13-16	COUNTRY	4-digit Code for Country. See Schedule C-E for codes.
17-18	DISTRICT	2-digit Code for U.S. Customs District. See Schedule D for codes.
19-20	YEAR	Statistical month of the data (88).
21-24	NOT USED	Not used, field is blank.
	ALL METHODS OF TRANS- PORTATION:	EACH FIELD CONTAINS 12 NUMERIC CHARACTERS.
25-36	Second Unit of Quantity	Alternate Quantity (e.g. LBS.).
37-48	Card Count	Number of detailed transactions included in Summary.
49-60	First Unit of Quantity	Quantity in Units as specified for the Commodity.
61-72	Value	Free alongside ship value at the U.S. port of export.
	VESSEL:	EACH FIELD CONTAINS 12 NUMERIC CHARACTERS.
73-84	Shipping Weight	Weight of the commodity in pounds.
85-96	Value	Free alongside ship value at the U.S. port of export.
	AIR:	
97-108	Shipping Weight	Weight of the commodity in pounds.
109-120	Value	Free alongside ship value at the U.S. port of export.

Monthly Vessel Clearances in Alphabetic Vessel Name Arrangement

Type Service

1. liner or berth
4. Tarbores
5. Irregular or Ir

1. Uniform cargo, steam dry cargo
2. Motor launch, steam launch
3. Tug
4. Barge (other than launch), sloop
5. Trawler barge
6. Other, including yacht, gun, sloop, sailboat, launchboat, rowboat, etc.

1. Vessel cleared direct to foreign ports in ballast
2. Vessel cleared direct to foreign ports with bulk cargo
3. Vessel cleared direct to foreign ports with general cargo
4. Vessel cleared via other domestic ports in ballast
5. Vessel cleared via other domestic ports with bulk cargo
6. Vessel cleared via other domestic ports with general cargo

- Country and Subdivision or U.S. Port
Indicates first foreign country altering direct to destination
of outbound voyage) in terms of Schedule C code. Where "country to" has marked coastal differences a further distinguishing
sub-country code is added otherwise sub-country code is always
"0". If altering in domestic ports, indicates first U.S. port
vessel entered in terms of Schedule D code.

0. Vessels to other domestic ports, Navy operated vessels, vessels in for repairs or crew changes, and all other types excluded by reason of IT 975 coverage

1. All vessels except tonnage cleared direct foreign ports
2. Tonnage cleared direct to foreign ports

1. All vessels coded "0" under type vessel
2. Bulk or general cargo
3. Ballast

0. No U.S. or in-transit export cargo laden at this port
1. U.S. or in-transit export cargo laden at this port
9. Vessels under 20 net registered tons

U. S. IMPORT AND EXPORT TRADE BY VESSEL AND AIR

MONTHLY VESSEL AND AIR EXPORTS AND IMPORTS BY COUNTRY, DISTRICT AND PORT

U.S. Port of Lading/Unloading by Country of Destination/Origin by SITC Code (Revision 3 Division) showing Port Totals and District Totals. Data exclude Inrck/rail.

(The data on each page of this report are presented in the format shown below.)

[illegible]

Section 9

Conversion Tables

In January of 1989, The United States adopted the Harmonized Commodity Description and Coding System (Harmonized System) as the nomenclature for classifying both exports and imports. The Harmonized System

collects information based on the metric standard. The following tables will assist data users in converting to metric quantities and values.

CONVERSION TABLE

Factors to Convert Reported Units of Quantity to Harmonized System Units of Quantity

Reported Units of Quantity Name/Abbreviation	HS Units of Quantity Name/Abbreviation	Multiplication Factor to Convert Reported Unit to HS
Barrel (BBL)	Thousand cubic meters (TCM)	0.0001590
Barrel (BBL)	Liter (LTR)	159.0
Board foot (BFT)	Cubic meter (CBM)	0.00236
Cubic foot (CF)	Cubic meter (CBM)	0.02832
Cubic yard (CYD)	Cubic meter (CBM)	0.7646
Content pound (CLB)	Content kilogram (CKG)	0.4536
Content pound (CLB)	Clean yield kilogram (CYK)	0.4536
Clean yield pound (CYP)	Clean yield kilogram (CYK)	0.4536
Clean yield pound (CYP)	Kg dry rubber content (KDR)	0.4536
Content ton (CTN)	Content ton (CTN)	0.9072
Cord (CD)	Cubic meter (CBM)	2.550
Centimeter (CM)	Meter (MTR)	0.010
Cubic centimeter (CC)	Liter (LTR)	0.001
Cubic meter (CBM)	Liter (LTR)	1,000.
Cubic meter (CBM)	Thousand cubic meters (TCM)	0.001
Millicurie (MC)	Curie (CUR)	0.0010
Curie (CUR)	Millicurie (MC)	1,000.
Dozen (DOZ)	Pieces (PCS)	12.00
Dozen (DOZ)	Dozen pair (DPR)	0.5000
Dozen (DOZ)	Gross (GR)	0.08333
Dozen (DOZ)	Thousand (THS)	0.0120
Dozen (DOZ)	Number (NO)	12.00
Dozen pair (DPR)	Dozen (DOZ)	2.000

Abbreviations for Units of Quantity

Abbreviation	Description	Abbreviation	Description
A	Amperas	KW	Kilowatts
AC	Alternating current	LNm	Linear meter
BBL	Barrel	LTR	Liters
BFT	Board Feet	LT	Long tons
BU	Bushels	BRU	Mechanical brushes
CAR	Carets	MTR	Meters
C	Celsius	MTN	Metric tons
CG	Centigrams	MC	Millicuries
CMS	Centimeters	ML	Milliliters
CYK	Clean yield kilograms	MM	Millimeters
CYP	Clean yield pounds	MUN	Million Units
CGR	Content grams	NESOI	Not elsewhere specified or included
CKG	Content kilograms	NO	Number
CMT	Content metric tons	OZ	Ounces
CLB	Content pounds	ODE	Ozone depletion equivalent
CST	Content short tons	PKS	Packs
CTN	Content tons	PRS	Pairs
CC	Cubic centimeters	PCS	Pieces
CFT	Cubic feet	LBS	Pounds
CBM	Cubic meter	PFG	Proof gallons
CYD	Cubic yards	PFL	Proof liters
CUR	Curie	RPM	Revolutions per minute
DC	Direct current	RBA	Running bales
DOZ	Dozen	SET	Set
DPR	Dozen pairs	STN	Short tons
DPC	Dozen pieces	SSG	Single-strength gallon
JWL	Dutiable jewels	SQ	Square
FT	Faet	SCM	Square centimeters
FBM	Fiber meter	SFT	Square feet
GAL	Gallons	SQM	Square meters
GM	Grams	SYD	Square yards
GRS	Gross	THS	Thousands
GBX	Gross boxes	MBF	Thousand board feet
GCN	Gross containers	MCF	Thousand cubic feet
GKG	Gross kilograms	TCM	Thousand cubic meters
GRL	Gross lines	MLF	Thousand linear feet
GTN	Gross metric ton	MYD	Thousand linear yards
GRP	Gross pair	THM	Thousand meters
GLB	Gross pounds	MSF	Thousand square feet
GKG	Gross yield kilograms	TNV	Ton raw value (metric)
GTN	Gross tons	TOZ	Troy ounces
GVW	Gross vehicle weight	VA	Voltempere
HSP	Horsepower	VOL	Volume
HND	Hundred	WT	Weight
CWT	Hundred weight	WG	Wine gallons
IN	Inches	YDS	Yards
KG	Kilograms	X	No unit of quantity required
KDR	Kilogram dry rubber content		

Section 10

Country Groupings

This section contains information on the country and territory designations for use in compiling the U.S. export and import statistics. In addition, selected international

organizations, economic and geographic country groupings are listed.

**Countries, Selected International Organizations, Economic
and Geographic Groupings**

EXPLANATORY NOTES: 1990 REPORTS**A. Country Identification: 1990**

- (1) Schedule C--"Classification of Country and Territory Designations for U.S. Foreign Trade Statistics," contains the complete and abbreviated alphabetic descriptions and numeric codes for countries appearing in current and/or historical Bureau of Census foreign trade data reports.

Continent and sub-continent codes (i.e., first digit of Schedule C code) are as follows:

1. North America
2. Central America
3. South America
4. Europe
5. Asia
6. Australia, New Zealand and Oceania
7. Africa

B. Country Table: 1989

- (2) Developed and developing countries--generally follow the country assignments made by the United Nations. Developed countries include Australia, Canada, Japan, New Zealand, South Africa, and Western Europe, (i.e., Andorra, Austria, Belgium, Cyprus, Denmark, Faroe Islands, Finland, France, Germany, Gibraltar, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta and Gozo, Monaco, Netherlands, Norway, Portugal, San Marino, Spain, Svalbard, Jan Mayen Island, Sweden, Switzerland, Turkey, United Kingdom, Vatican City, and Yugoslavia). Developing countries include the rest of the world except Eastern Europe (i.e., Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania, U.S.S.R.) and China, Mongolia, North Korea, and Vietnam.
- (3) Developing Africa, Asia and Oceania--excludes South Africa, Japan, Australia and New Zealand; includes all other Africa, Asia and Oceania.
- (4) Developing Western Hemisphere--excludes Canada; includes all other North America, South America, and Central America including island nations situated in the South Atlantic Ocean and Caribbean Sea areas.

- (5) APEC (Asia-Pacific Economic Cooperation):
Australia, Brunei, Canada, China, Hong Kong, Indonesia, Japan, South Korea, Malaysia, New Zealand, Philippines, Singapore, Taiwan, Thailand, United States.
- (6) Arab League:
Algeria, Bahrain, Djibouti, Egypt, Iraq, Jordan, Kuwait, Lebanon, Libya, Mauritania, Morocco, Oman, Qatar, Saudi Arabia, Somalia, Sudan, Syria, Tunisia, United Arab Emirates, Yemen.
- (7) Arab Maghreb Union:
Algeria, Libya, Mauritania, Morocco, Tunisia.
- (8) ASEAN (Association of South East Asian Nations):
Brunei, Indonesia, Malaysia, Philippines, Singapore, Thailand.
- (9) Cairns Group:
Argentina, Australia, Brazil, Canada, Chile, Colombia, Hungary, Indonesia, Malaysia, New Zealand, Philippines, Thailand, Uruguay.
- (10) CACM (Central American Common Market):
Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua.
- (11) CIS (Commonwealth of Independent States):
Armenia, Azerbaijan, Byelarus, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.
- (12) COCOM (Coordinating Committee for Multilateral Export Controls):
Australia, Belgium, Canada, Denmark, France, Germany, Greece, Italy, Japan, Luxembourg, Netherlands, Norway, Portugal, Spain, Turkey, United Kingdom, United States.
- (13) CSCE (Conference on Security and Cooperation in Europe):
Albania, Armenia, Austria, Azerbaijan, Belgium, Bosnia-Herzegovina, Bulgaria, Byelarus, Canada, Croatia, Cyprus, Czechoslovakia, Denmark, Estonia, Finland, France, Germany, Greece, the Holy Sea, Kazachatan, Kyrgyzstan, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Monaco, Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Slovenia, Spain, Sweden, Switzerland, Tajikistan, Turkey, Turkmenistan, Ukraine, United Kingdom, United States, Uzbekistan, Yugoslavia.
- (14) Council of Europe:
Austria, Belgium, Cyprus, Denmark, Finland, France,

- Germany, Greece, Hungary, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Netherlands, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, Turkey, United Kingdom.
- (15) EC (European Community):
Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, United Kingdom.
- (16) EFTA (European Free Trade Association):
Austria, Finland, Iceland, Liechtenstein, Norway, Sweden, Switzerland.
- (17) GCC (Gulf Cooperation Council):
Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, United Arab Emirates.
- (18) Group of 5:
France, Germany, Japan, United Kingdom, United States.
- (19) Group of 7:
Canada, France, Germany, Italy, Japan, United Kingdom, United States.
- (20) Group of 15:
Algeria, Argentina, Brazil, Egypt, India, Indonesia, Jamaica, Malaysia, Mexico, Nigeria, Peru, Senegal, Venezuela, Yugoslavia, Zimbabwe.
- (21) LAFTA (Latin American Free Trade Association):
Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Mexico, Paraguay, Peru, Uruguay, Venezuela.
- (22) Near East Asia:
Bahrain, Iran, Iraq, Iraq-Saudi Arabia, Neutral Zone, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syrian Arab Republic, United Arab Emirates, Yemen.
- (23) Other Asia except ASEAN or NICS:
Afghanistan, Bangladesh, Bhutan, Brunei, Burma, Cambodia, China, India, Japan, Laos, Macau, Maldive Islands, Mongolia, Nepal, North Korea, Pakistan, Sri Lanka, Vietnam.
- (24) NICS (Newly Industrialized Countries of Asia):
Hong Kong, Singapore, South Korea, Taiwan.
- (25) Nordic Council:
Denmark, Finland, Iceland, Norway, Sweden.
- (26) NATO (North Atlantic Treaty Organization):
Belgium, Canada, Denmark, France, Germany, Greece,

Iceland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Turkey, United Kingdom, United States.

- (27) OAPC (Organization of Arab Petroleum Exporting Countries):
Algeria, Bahrain, Egypt, Iraq, Kuwait, Libya, Qatar, Saudi Arabia, Syria, United Arab Emirates.
- (28) OAS (Organization of American States):
Antigua and Barbados, Argentina, the Bahamas, Barbados, Belize, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cuba (participation suspended), Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, St. Christopher-Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Trinidad and Tobago, United States, Uruguay, Venezuela.
- (29) OECD:

**Schedule C - Classification of Country and Territory
Designations for U.S. Foreign Trade Statistics**

Schedule C code	Country and territory designation	Abbreviated designation
	<p>Schedule C contains the country and territory designations for use in compiling the U.S. export and import statistics. These designations should be shown in all cases where statistical information is required. The first part of this schedule contains the country designations arranged in numeric order by continent and listed in sequence within each continent generally from north to south and west to east. Abbreviated country designations, which are used in lieu of complete country names in some foreign trade reports, are also shown. The second part contains a listing in alphabetical arrangement of the countries, territories, etc., with their numeric codes.</p> <p>The names of the entities listed are generally the conventional spellings as approved by the U.S. Board on Geographic Names.</p> <p>Revisions to Schedule C will be announced in the form of "special notices" to data users, as Public Bulletins to Schedule B, <u>Statistical Classification of Domestic and Foreign Commodities Exported from the United States</u>, and as supplements to the <u>Harmonized Tariff Schedule of the United States Annotated for Statistical Purposes</u> (HTS). HTS also includes a list of International Standard (ISO) Country Codes to be used by importers to report country of origin.</p>	

Schedule C - Classification of Country and Territory
Designations for U.S. Foreign Trade Statistics

Schedule C code	Country and territory designation	Abbreviated designation

CENDATA™

CENDATA™ is an online data service offering the most current and widely used facts, specializing in press releases and information on ordering the latest data products. Foreign Trade Division puts the entire monthly *U.S. Merchandise Trade Press Release and Supplement* on CENDATA™. CENDATA™ is made available through cooperating private vendors, DIALOG and CompuServe, that provide nationwide access to information supplied by the Census Bureau through their own long-distance networks. They bill customers for time used on their system, but no extra charge is made for access to the census data. CENDATA™ is set up for very simple access: the user retrieves any of several thousand screensful of information simply by selecting appropriate items on a succession of menus. DIALOG also supports key-word searching, but neither vendor provides any mechanism for manipulating the data.

Any computer with a modem and communications software can access CENDATA™, once an account has been established with one of the vendors. Most communications software packages can send the information from CENDATA™ to the user's printer or save it to a file on a floppy or hard disc. With some effort, the resulting file can be imported into the user's analytic software, although frequently it is necessary to first edit the data in another program.

Most data sets accessible via CENDATA™ are relatively small, because it takes a relatively long time to transmit data over phone lines. Even at 2400 baud (the fastest speed that currently works well over conventional long distance phone lines), it takes more than 20 minutes to transmit as much data as fit on a floppy disk, and more than a week of continuous transmission to fill up a high-density tape.

THE ECONOMIC BULLETIN BOARD

The Economic Bulletin Board provides data users with three types of services, reading bulletins, downloading files, and sending or receiving messages to or from the Board. Functions available on other computer bulletin board services such as uploading files or sending messages to other users are not available on this service.

BULLETINS will provide data users with general economic news; a calendar of release dates for upcoming economic news, contacts in economic statistical agencies, and instructions on how to use the bulletin board. Currently there are 26 bulletins available on the Board.

FILES contain other information which is too large to be included in a bulletin or too specific to be of general interest. These include the major economic press releases from the Bureau of Economic Analysis, Bureau of Labor Statistics, and Bureau of the Census. Foreign Trade Division puts the entire monthly *U.S. Merchandise Trade Press Release and Supplement* up on one of the Board's files.

Files can be downloaded from the bulletin board to the data user's machines. Several numeric files are available in Lotus 1-2-3 worksheet version. These may be downloaded to your machine and used directly with Lotus without intermediate processing to put it into a form readable by Lotus.

For more information on The Economic Bulletin Board you can call (202) 377-1986.

List of Classification Schedules

To facilitate the compilation of the foreign trade statistics, various classification schedules are used for translating data such as commodity, country, district, etc. into numeric codes. The schedules contain lists of names or descriptions of the items with their assigned numeric codes. Following is a list of the classification schedules used in compiling and publishing the foreign trade statistics:

Schedule B- Statistical Classification of Domestic and Foreign Commodities
Exported From The United States

Schedule C- Classification of Country and Territory Designations for U.S.
Foreign Trade Statistics

Schedule D- Classification of U.S. Customs Districts and Ports for U.S.
Foreign Trade Statistics

Schedule K- Classification and of Foreign Ports by Geographic Trade Area
and Country

Harmonized Tariff Schedule of the United States Annotated

Standard International Trade Classification Revision 3

Copies of Schedule B and HTSUSA may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. For information regarding other schedules, contact the Bureau of the Census.

NATIONAL TRADE DATA BANK The Export Connection

The National Trade Data Bank (NTDB) provides analysts and policymakers with the best of the trade and export promotion data from 15 federal agencies. Established by the Omnibus Trade and Competitiveness Act of 1988, the NTDB is the result of the Trade Act's charge to the Secretary of Commerce and other federal agencies to assemble economic, demographic, social, and other statistics of the United States and other countries that are of use to "business firms that are engaged in export-related activities and to Federal and State agencies that promote exports."

The data series in the NTDB include merchandise trade import and export data from the Bureau of Census; the complete text of the CIA World Factbook; U.S. international transactions data, and the quarterly National Income and Product Accounts, prepared by the Bureau of Economic Analysis; exchange rates, and foreign interest rate data, compiled by the Federal Reserve Board; international labor and price statistics, compiled by the Bureau of Labor Statistics; the complete text of the International Trade Administration's publications "Understanding U.S. Foreign Trade" and "European Community 1992 Analysis," as well as the data tables from the U.S. Industrial Outlook; and many other data files, which comprise more than 600 megabytes of information—enough to fill over 1,500 floppy diskettes.

The NTDB will be continually updated and distributed each month on one optical disk, known more commonly as

a CD-ROM. Each monthly disk contains the complete data base, and includes user-friendly software that will make locating, extracting, and printing NTDB data a fast, simple process.

The NTDB CD-ROM can be used on an IBM-compatible personal computer equipped with a minimum of 512K of memory, and ISO 9660 CD-ROM reader, and the Microsoft CD-ROM DOS extension (version 2.0 or higher). The NTDB software will support a color monitor and mouse.

A 12-issue annual subscription to the National Trade Data Bank CD-ROM is \$360, and can be arranged through the National Technical Information Service (NTIS) at 703-487-4630. Mention the NTIS publication number PB90-59174LEP. Single copies of the most recent NTDB CD-ROM are available for \$35, and may be ordered from NTIS at 703-487-4650. Mention the NTIS publication number PB90502345LEP.

Although the principal means of distribution of the NTDB is through CD-ROMs, NTDB data may also be obtained on magnetic tape and by electronic transfer from the NTDB mainframe computer. For more information on these "NTDB Premium Services," contact NTIS at 703-487-4630.

For more information on the NTDB, please call the U.S. Department of Commerce, Office of Business Analysis at 202-377-1986.

FOREWORD

International trade is an increasingly important factor in the growth of the world economy. Foreign trade data--information that describes the value and composition of commodities in international trade--are used by analysts and market researchers to make important commercial and political decisions. Many researchers and analysts, however, are not well versed in the origins of trade data, the variety of foreign trade data available, the strengths and weaknesses of various trade data series, and the pitfalls of improper data usage.

Until now there has not been a comprehensive publication providing both a brief introduction to merchandise trade data for the occasional user of aggregate trade data and a more technical description for users of more detailed and complex trade data series. This publication is intended to provide both straightforward information for novices and information and guidance for trade specialists who utilize detailed U.S. foreign trade data in their day-to-day work.

The first part of the publication--intended primarily for those who have little or no experience with foreign trade data--provides an overview of U.S. foreign trade data and their uses. Those seeking a comprehensive understanding of trade statistics should carefully review the first section before delving into the more detailed second section.

The second section is intended for those who require a more detailed knowledge of foreign trade data. It describes various data series in detail, explains how to avoid problems when using the data (especially the pre-1978 data), and provides guidance for performing analyses.

This publication attempts to present useful information on a relatively obscure but very important topic. Every effort has been made to ensure that the information in this study is accurate as of yearend 1984. It should be noted, however, that undoubtedly changes in foreign trade data methodologies will render obsolete some of the material in this report.

I believe this publication will be an invaluable resource to a broad range of people interested in U.S. foreign trade data. We welcome your comments and suggestions.

International Trade Administration

INTRODUCTION

This is the fifth annual report on U.S. trade performance by the International Trade Administration. It presents a comprehensive analysis of U.S. trade in 1988 and relates U.S. trade to global trade and investment flows. The report examines trade in merchandise, business services, and other current account components—the measure of the balance on all U.S. transactions with the rest of the world. The relation of export and import developments to U.S. international financial transactions also is described.

The United States experienced an improvement in its merchandise trade account in 1988. The trade deficit fell from \$152.1 billion in 1987 to \$119.8 billion in 1988. The record decline was due largely to a surge in U.S. merchandise exports which increased by 26.6 percent (versus 11.8 percent in 1987) to a record \$321.8 billion. At the same time, imports grew only 8.7 percent in 1988 (versus 11.2 percent in 1987).

The improvement in the trade balance substantially boosted economic growth and employment in 1988. U.S. economic growth in 1988 was export led, with merchandise exports directly contributing 34 percent of total U.S. GNP growth and a near record increase in the number of jobs. These impressive figures showed that international trade was the most vigorous sector of the American economy in 1988.

The United States is the world's largest exporter and importer of both goods and services. We have a critical stake in the effective functioning of the international trading system. Our export sales are essential to pay for the goods and services we import, and workers benefit from exports through the revenues and jobs they create. Imports provide important inputs to U.S. industry and benefit U.S. consumers.

U.S. trade performance in the 1980s has generated intense public debate about the economic factors affecting the U.S. balance of trade, trade policies, and the institutions designed to deal with them. This attention reflects an increasing public awareness of the interdependence of our economy with the economies of other countries (both industrial and developing) and a concern over the effects of continued large trade imbalances on the U.S. economy. The focus on trade

issues has led to a renewed commitment in the United States to improving our international competitiveness.

Much has been accomplished over the past several years to improve U.S. trade performance, both by the U.S. Government and by American business. In 1988, we saw the beginning of a correction in our trade imbalances of recent years. Our aim is to build on this improvement in the years ahead. Much remains to be done, while new challenges are appearing on the horizon.

The U.S. trade deficit is in part a macroeconomic phenomenon. The United States needs to make further progress in addressing the shortfall between domestic savings and investment. To this end, efforts to control federal spending and bring the federal budget into balance must be continued. In addition, the United States must explore ways to encourage private savings and domestic capital formation to complement efforts to eliminate the budget deficit.

Continued strength of U.S. exports will depend on preserving and improving U.S. access to foreign markets. A priority U.S. trade policy objective is a successful conclusion to the Uruguay Round of multilateral trade negotiations. Our efforts include expanding the scope of international trade rules to "new" areas such as intellectual property, services and investment. U.S. Government priorities also include working on successful implementation of the United States-Canada Free Trade Agreement, which came into effect at the beginning of 1989; efforts to ensure U.S. access to Western Europe's markets while the European Community attempts to unify its markets by 1992; and continuing our efforts to open the Japanese market. We will continue our aggressive use of bilateral and multilateral negotiations, GATT procedures, and U.S. trade laws to deal with the unfair trade practices of other countries to ensure that all trading nations play by the same rules.

At the same time, a major U.S. objective is the further strengthening of macroeconomic policy cooperation among the key trading nations to help increase trade flows and promote adjustment of trade and current account imbalances. The "Plaza Agreement" of 1985 marked the beginning of a concerted effort to strengthen macroeconomic coordination among major trading

nations. The success of this agreement acted as a catalyst in realigning exchange rates which, coupled with stronger economic growth abroad, has created increased export opportunities for U.S. firms. The sharp rise in U.S. exports in 1988 indicates that U.S. firms are taking advantage of the opportunities created by our international economic policy efforts.

Achievement of these objectives will continue the trend toward reducing the U.S. trade deficit. The road to deficit reduction, however, will not be easy.

Slowing economic growth abroad could harm U.S. export prospects. Strong foreign economic growth is essential for continued U.S. export gains. Finally, continuing debt problems are likely to hamper trade and growth prospects among many less developed countries. The Brady Plan provides a promising basis for dealing with the burden of high-debt developing countries.

Reduction of our trade deficit will become more and more difficult. As U.S. firms recapture increasing shares of domestic and foreign markets, an unfortunate result of this adjustment process could be increased protectionist pressures and bilateral tensions in world trade. This will pose a great challenge to the openness of the multilateral trading system.

The U.S. Government continues to be a willing and aggressive partner of American business to create the right environment for export expansion. The government primarily should serve as a catalyst for American industry, including small and medium-sized businesses, in dealing with foreign governments on trade matters. Most important, government should make certain it does not impede the efforts of our private sector in world markets.

In the end, it is up to American business to double and redouble its efforts—in innovation, investment, marketing, pricing, and quality—to expand exports. The government can work to knock down trade barriers in foreign countries that will give us expanded export opportunities, but we have to ensure that our products and services are competitive in order to capitalize on these opportunities. This is the responsibility of American business. The private sector must continue to do what other nations do and pull out all stops to win and maintain foreign customers.

This report provides a useful analysis of our trade situation and can increase our understanding of the problems facing the U.S. business community. Hopefully, the facts outlined will assist in the search for solutions.

ACKNOWLEDGMENTS

UNITED STATES TRADE PERFORMANCE IN 1988 was produced under the direction of Dr. Barbara N. McLennan, Deputy Assistant Secretary for Trade Information and Analysis, International Trade Administration, U.S. Department of Commerce. Others with major responsibilities include:

Project Director: Lester A. Davis.

Principal writers: Lester A. Davis, Victoria L. Hatter, Jeffrey W. Lins, and Georg M. Mehl.

Special topic writers are identified before each topic.

Statistics: Victor Bailey, Lester Davis, Victoria Hatter, Vera Hartman, Harvey Schultz, and Joanne Tucker.

Graphics: Lester A. Davis and Dorothy A. Minor.

Stenographic support: Andree M. Turner.

General supervision was provided by Henry P. Misisco, Director, Office of Trade and Investment Analysis (OTIA), assisted by Jeffrey W. Lins, Deputy Director, OTIA, and Gary R. Teske, Director, Trade Research Division, OTIA.

The cooperation of various government agencies in providing data and other assistance is gratefully acknowledged. Among these, the Department's Bureau of the Census provided the U.S. trade data, mainly in the form of data tapes; the Bureau of Economic Analysis provided the U.S. services and other international financial transactions data.

Questions about the content of this publication should be directed to the Office of Trade and Investment Analysis, Room H-2217, U.S. Department of Commerce, Washington, D.C. 20230. Phone: (202) 377-2456.

FOREWORD

This publication presents data on U.S. merchandise trade with major trading partners and regions. It also contains an overview that summarizes major trends in U.S. trade, with particular focus on 1988 developments. Emphasis is on aggregate export and import growth rates, trends in U.S. trade balances, and shifts in the commodity composition of U.S. exports and imports. In addition, each geographic section contains a graphic on U.S. exports, imports, and trade balance movements.

Summary tables present data on U.S. foreign trade (in total merchandise, manufactures, and agriculture) with the world, all individual countries of the world, and the major geographic regions, for the years 1980 through 1988. Also included are tables showing the top 50 U.S. export markets, the top 50 foreign suppliers, the top 50 partners in U.S. foreign trade, as well as the top 35 surplus and deficit countries in U.S. bilateral trade.

Data presenting U.S. exports to the world are given in two forms: data tables that include trade in special category or military type goods and data tables that exclude trade in special category goods.

U.S. bilateral trade by commodity at the 1-digit and 3-digit levels are presented in tabular form for most U.S. trading partners and regions. The 3-digit data are presented in descending order of magnitude, ranked by commodity importance in full-year 1988 trade. All country and regional data (unless noted otherwise) exclude trade in military goods.

This 1988 edition includes special discussions of the U.S. adoption of the Harmonized System of trade classification beginning in January 1989. This report also compares imports on a source country basis valued on a Customs basis and on a c.i.f. basis during the 1980s.

In contrast to previous publications in this series, import data are presented on a Customs value basis as well as the c.i.f. value basis. Beginning with data for 1989, the U.S. Department of Commerce plans to emphasize imports valued on a Customs basis.

Barbara N. McLennan
Deputy Assistant Secretary
for Trade Information and Analysis

**Schedule D - Classification of U.S. Customs Districts and Ports for
U.S. Foreign Trade Statistics**

Code Number, Customs District and Port	Code Number, Customs District and Port
<p>Schedule D provides a list of U.S. Customs districts, the ports included under each district, and the corresponding numeric codes used in compiling the U.S. foreign trade statistics. The Schedule contains a code for each official U.S. Customs district and port, with some additional codes provided to meet specific compiling requirements of the foreign trade statistics program. The headquarters port for each district is underlined. Some Customs ports show two codes. Exporters and importers may report either code. The first part of this schedule contains the Customs districts and ports arranged in numeric order by code, while the second part lists the ports in alphabetic order.</p>	
<p>Revisions to Schedule D will be announced in the form of "special notices" to data users, as Public Bulletins to Schedule B, <u>Statistical Classification of Domestic and Foreign Commodities Exported from the United States</u>, and as supplements to the <u>Harmonized Tariff Schedule of the United States Annotated for Statistical Purposes</u>.</p>

CORRECT WAY TO FILL OUT THE SHIPPER'S EXPORT DECLARATIONS

(Follow carefully to avoid delay at shipping point.)

1. Purpose

The Shipper's Export Declarations (SEDs), Forms 7525-V and 7525-V-Alternate (Intermodal) and the Shipper's Export Declaration for In-Transit Goods, Form 7513, are joint Bureau of the Census — International Trade Administration documents used for compiling the official U.S. export statistics and administering the requirements of the Export Administration Act, as provided for in the Foreign Trade Statistics Regulations (FTSR) (15 CFR, Part 30) and the Export Administration Regulations (15 CFR, Parts 768 — 799).

2. Forms

The SED, Form 7525-V, its continuation sheet, and the in-transit SED, Form 7513, may be purchased from the Superintendent of Documents, Government Printing Office, Washington, DC 20402, local Customs District Directors, or privately printed. Form 7525-V-Alternate (Intermodal) and its continuation sheet must be privately printed. Sample copies may be obtained from the Bureau of the Census, Washington, DC 20233. When privately printing SEDs, the forms must conform in every respect to the official forms in size, wording, color (**black ink on buff paper — form 7513 on pink paper**), weight of paper stock (not less than 16 nor more than 20 pounds commercial substance), and arrangement including the Office of Management and Budget Approval Number printed in the upper right-hand corner of the face of the form. The SEDs are designed to allow their inclusion as part of a set of documents so that an exporter can prepare several shipping documents at the same time. Form 7525-V (See page 8.) aligns with the Canadian invoice, air waybills, and other vertically oriented documents. Form 7525-V-Alternate (Intermodal) aligns with the ocean bill of lading and other horizontally oriented documents. Either form may be used regardless of method of transportation or destination.

The Bureau of the Census has a program whereby exporters, carriers, or freight forwarders may submit monthly reports via electronic medium in lieu of filing an individual Shipper's Export Declaration for each shipment.

3. When Required

SEDs are required to be filed for virtually all shipments, including hand-carried merchandise, (**see section 9 for exemptions, particularly if the shipment is valued \$2,500 or less**) from the United States (50 States and the District of Columbia); Puerto Rico; U.S. or Puerto Rican Foreign Trade Zones (FTZs); and the U.S. Virgin Islands to all foreign countries or areas, including FTZs located therein. (See 91 for the exemption for shipments from the United States to Canada.)

SEDs are also required to be filed for shipments between the United States and Puerto Rico and from the United States or Puerto Rico to the U.S. Virgin Islands.

SEDs are not required for shipments from the United States or Puerto Rico to U.S. Possessions (except the U.S. Virgin Islands) or from a U.S. Possession to the United States, Puerto Rico, or another U.S. Possession.

The SED for in-transit merchandise (Form 7513) is required to be filed for:

- (a) merchandise destined from one foreign country to another which transits the United States, Puerto Rico or the U.S. Virgin Islands and is **exported by vessel** regardless of the method of transportation by which the merchandise entered. If a validated export license is

required this form must be filed regardless of the method of transportation for the export;

- (b) merchandise exported from General Order Warehouses; and
- (c) imported merchandise which has been rejected by government inspection and is being exported. (Form 7513 is **not** to be used for the reexport of imported merchandise, except government rejected merchandise.)

4. Number of Copies Required

- (a) One copy for shipments to Canada, (see 91 for the exemption for shipments from the United States to Canada), Puerto Rico, and the U.S. Virgin Islands
- (b) One copy for exports through the U.S. Postal Service
- (c) Two copies on original forms for all other shipments

Additional copies may be required for export control purposes by the International Trade Administration, other Government agencies (when authorized), Customs Directors, or the Postmaster.

5. Preparation and Signature

The SED shall be prepared in English in a permanent medium with the original signed (signature stamp acceptable) by the exporter or his duly authorized agent. The agent's authority to sign the SED must be executed by a power-of-attorney or as authorized on the SED.

6. Requirement for Separate SEDs

Separate SEDs are required for each shipment from one consignor to one consignee on a single exporting carrier (including **each** rail car, truck, or other vehicle). However, Customs Directors may waive this requirement if multiple car shipments are made under a single loading document and cleared simultaneously. Also, merchandise requiring a validated export license shall not be reported on the same SED with merchandise moving under general license. However, merchandise moving under more than one general or more than one validated license may be reported on the same SED.

7. Presentation

- (a) Postal Shipments — the SEDs shall be delivered to the Postmaster with the packages at the time of mailing.
- (b) Pipeline shipments — the SEDs shall be submitted to the Customs Director within 4 working days after the end of the calendar month.
- (c) All other shipments — the SEDs shall be delivered to the exporting carrier **prior** to exportation.
- (d) Exporting carriers are required to file SEDs and manifests with Customs — See Sections 30.20 through 30.24 of the FTSR.

Shipments from an interior point — SED may accompany the merchandise being transported to the exporting carrier or the port of exportation, or it may be delivered directly to the exporting carrier.

Shipments exempt from SED filing requirements — a reference to the exemption must be noted on the bill of lading, air waybill, or other loading document for verification that no SED is required.

B. Corrections

Corrections, amendments, or cancellations of data may be made directly on the originally filed SED, if it has not been forwarded to the Bureau of the Census. If the SED has been forwarded to the Bureau, corrections, amendments, or cancellations should be made on a copy of the originally filed SED (marked "Correction Copy") and filed with the Customs Director or the Postmaster where the declaration was originally presented.

C. Exemptions

- A.** Shipments (excluding postal shipments) where the value of commodities classified under each individual Schedule B number is **\$2,500 or less** and for which a validated export license is not required and when shipped to countries not prohibited by the Export Administration Regulations (15 CFR, Parts 768 – 799).
- B.** Shipments through the U.S. Postal Service that do not require a validated license when the shipment is: (1) valued **\$500** or under, (2) either the consignee or the consignor is not a business concern, or (3) the shipment is not for commercial consideration.
- C.** In-transit shipments not requiring a validated export license and leaving for a foreign destination by means other than vessel.
- D.** Shipments from one point in the United States to another point thereof by routes passing through Mexico, and shipments from one point in Mexico to another point thereof by routes passing through the United States.
- E.** Shipments to the U.S. Armed Services
 - (1) All commodities consigned to the U.S. Armed Services, including exchange systems.
 - (2) Department of Defense Military Assistance Program Grant-Aid shipments being transported as Department of Defense cargo.
- F.** Shipments to U.S. Government Agencies and Employees
 - (1) Office furniture and supplies for use in Government offices.
 - (2) Household goods and personal property for the use of U.S. Government employees.
 - (3) Food, medicines, and related items and other commissary items for use by U.S. Government employees and offices.
 - (4) Government shipments of books, charts, maps, and so forth, for use by libraries or similar institutions.
- G.** Miscellaneous Exemptions
 - (1) Diplomatic pouches and their contents.
 - (2) Human remains and accompanying appropriate receptacles and flowers.
 - (3) Shipments of gift parcels moving under General License GIFT.
 - (4) Shipments of interplant correspondence and other business records from a U.S. firm to its subsidiary or affiliate.
 - (5) Shipments of pets as baggage, accompanying or unaccompanied persons leaving the United States.

H. Conditional Exemptions

SEDs are not required for the following if they are not shipped as cargo under a bill of lading or air waybill and do not require a validated export license.

- (1) Baggage and household effects and tools of trade of persons leaving the United States when such are owned by the person, in his possession at the time of departure and intended for his use only.
- (2) Carriers' stores, supplies, equipment, bunker fuel, and so forth, when not intended for unloading in a foreign country.
- (3) Usual and reasonable kinds and quantities of dunnage necessary to secure and stow cargo. (For sole use on board the carrier.)

If the shipments indicated above are shipped under a bill of lading or air waybill, the SED should show in the description column in lieu of a description, a statement that the shipment consists of baggage, personal effects, and so forth, and Schedule B Commodity Numbers should not be shown.

If these shipments require a validated export license, the SED must identify the shipment as baggage, personal effects, and so forth, and must contain all of the information required on the SED.

I. Exemption for shipments from the United States to Canada

- (1) Except as noted in (2) below of this item, Shipper's Export Declarations are not required for shipments originating in the United States **where the country of ultimate destination is Canada.**
- (2) This exemption does not apply to the following shipments:
 - (a) Requiring a Department of Commerce validated export license.
 - (b) Subject to the Department of State, Office of Defense Trade Controls, export license under the International Traffic in Arms Regulations (ITAR-22 CFR parts 121 – 130).
 - (d) Requiring a Department of Justice, Drug Enforcement Administration, export declaration (21 CFR part 1313).

10. Retention of Shipping Documents

The Bureau of the Census, the International Trade Administration, and the U.S. Customs Service may require the exporters or their agents to produce copies of shipping documents within 3 years of exportation. Additional requirements for licensed shipments appear in the Export Administration Regulations.

11. Administrative Provisions

SEDs and the information contained thereon are confidential and used solely for official purposes authorized by the Secretary of Commerce in accordance with 13 U.S.C. Section 301(g). Neither may be disclosed to anyone except the exporter or his agent by those having possession of or access to any official copy.

Information from SEDs (except common information) may not be copied to manifests or other shipping documents. Exporters may not furnish SEDs or their information to anyone for unofficial purposes.

11. Administrative Provisions — Continued

Copies of the SEDs may be supplied to exporters or their agents when such copies are needed to comply with official requirements as authorization for export, export control requirements, or U.S. Department of Agriculture requirements for proof of export in connection with subsidy payments. Such copies will be stamped certified, and not for any other use and may not be reproduced in any form.

When the Secretary of Commerce or delegate determines that the withholding of information provided on an individual SED is contrary to the "National Interest," the Secretary or delegate may make such information available taking safeguards and precautions as deemed appropriate.

A SED presented for export constitutes a representation by the exporter that all statements and information are in accordance with the export control regulations. The commodity described on the declaration is authorized under the particular license as identified on the declaration, all statements conform to the applicable licenses, and all conditions of the export control regulations have been met.

It is unlawful to knowingly make false or misleading representation for exportation. This constitutes a violation of the Export Administration Act, 50 U.S.C. App. 2410. It is also a violation of export control laws and regulations to be connected in any way with an altered SED to effect export.

Commodities that have been, are being, or for which there is probable cause to believe they are intended to be exported in violation of laws or regulations are subject to seizure, detention, condemnation, or sale under 22 U.S.C. Section 401.

To knowingly make false or misleading statements relating to information on the SED is a criminal offense subject to penalties as provided for in 18 U.S.C. Section 1001.

Violations of the Foreign Trade Statistics Regulations are subject to civil penalties as authorized by 13 U.S.C. Section 305.

12. Regulations

Detailed information regarding the SED and its preparation is contained in the Foreign Trade Statistics Regulations (FTSR) (15 CFR, Part 30). Also, the FTSR should be consulted for special provisions applicable under particular circumstances. Copies may be purchased from the Bureau of the Census, Washington, DC 20233-0001. Information concerning export control laws and regulations of the International Trade Administration is contained in the Export Administration Regulations, which may be purchased from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

13. Office of Management and Budget response burden paragraph

Public reporting burden for this collection of information is estimated to average slightly more than 11 minutes (1.86 hour) per response for forms 7525-V and 7525-V Alternate (Intermodal); and 15 minutes (.25 hour) per response for form 7513, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden or any other aspect of this collection of information, including suggestions for reducing this burden to the Associate Director for Management Services, Bureau of the Census, Washington, DC 20233-0001; and to the Office of Management and Budget, Washington, DC 20503.

Reference Schedules

Schedule B — Statistical Classification of Domestic and Foreign Commodities Exported from the United States.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 and local U.S. Customs District Directors.

Schedule C — Classification of Country and Territory

Designations for U.S. Foreign Trade. Free from the Bureau of the Census, Washington, DC 20233-0001. Also included as part of Schedule B.

Schedule D — Classification of Customs Districts and Ports.

Free from the Bureau of the Census, Washington, DC 20233-0001. Also included as part of Schedule B.

Schedule K — Classification of Foreign Ports by Geographic Trade Area and Country.

Free from the Bureau of the Census, Washington, DC 20233-0001.

Foreign Trade Statistics Regulations. For sale by the Bureau of the Census, Washington, DC 20233-0001.

Export Administration Regulations. For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 and U.S. Department of Commerce District Offices.

NOTE: This is an instructional pamphlet summarizing the preparation of the SED. It is in no way intended as a substitute for either the *Foreign Trade Statistics Regulations* or the *Export Administration Regulations*.

INFORMATION TO BE REPORTED ON SEDS

Data	FTSR Reference	SED Item Number		
		7525-V	7525-V Alternate (Intermodal)	7513
Exporter — The name and address of the principal party responsible for effecting export from the United States. The exporter as named on the validated export license. Report only the first five digits of the ZIP code.	30.7(d)	1(a)	2	5
Exporter Identification Number — The exporter's Internal Revenue Service Employer Identification Number (EIN) or Social Security Number (SSN) if no EIN has been assigned.	30.7(d)	1(b)	34	NA
Related Party Transaction — One between the U.S. exporter and the foreign consignee, that is, an export from a U.S. person or business enterprise to a foreign business enterprise or from a U.S. business enterprise to a foreign person or business enterprise, when the person owns (directly or indirectly) at any time during the fiscal year, 10 percent or more of the voting securities of the incorporated business enterprise, or an equivalent interest if an unincorporated business enterprise, including a branch.	30.7(v)	1(c)	35	NA
Agent of Exporter — The name and address of the duly authorized forwarding agent.	30.7(e)	5	7	4
Ultimate Consignee — The name and address of the party actually receiving the merchandise for the designated end-use or the party so designated on the validated export license.	30.7(f) 30.4	4(a)	3 31	6
Intermediate Consignee — The name and address of the party in a foreign country who effects delivery of the merchandise to the ultimate consignee or the party so named on the export license.	30.7(g)	4(b)	4	NA
Exporting Carrier — The name of the carrier transporting the merchandise out of the United States. For vessel shipments, give the vessel's flag also.	30.7(c)	10	14	1
U.S. Port of Export (a) Overland — the U.S. Customs port at which the surface carrier crosses the border. (b) Vessel and Air — the U.S. Customs port where the merchandise is loaded on the carrier which is taking the merchandise out of the United States. (c) Postal — the U.S. Post Office where the merchandise is mailed.	30.7(a) 30.20	11	15	2
Method of Transportation — The mode of transport by which the merchandise is exported. Specify by name, i.e., vessel, air, rail, truck, etc. Specify "own power" if applicable.	30.7(b)	9	30	NA
Loading Pier — (For vessel shipments only) The number or name of the pier at which the merchandise is laden aboard the exporting vessel.	30.7(c)	8	10	NA
Containerized — (For vessel shipments only) Cargo originally booked as containerized cargo and that placed in containers at the vessel operator's option.	30.7(u)	13	11(a)	NA
Point (State) of Origin or Foreign Trade Zone (FTZ) Number (a) The two-digit U.S. Postal Service abbreviation of the state in which the merchandise actually starts its journey to the port of export, or (b) The state of the commodity of the greatest value, or (c) The state of consolidation, or (d) The Foreign Trade Zone Number for exports leaving a FTZ.	30.7(t)	6	8	NA
Foreign Port of Unloading — (For vessel and air shipments only) The foreign port and country at which the merchandise will be unladen from the exporting carrier.	30.7(h)	12	16	7
Country of Ultimate Destination — The country in which the merchandise is to be consumed, further processed, or manufactured; the final country of destination as known to the exporter at the time of shipment; or the country of ultimate destination as shown on the validated export license.	30.7(i)	7	33	8
Marks, Numbers, and Kinds of Packages — Marks, numbers, or other identification shown on the packages and the numbers and kinds of packages (boxes, barrels, baskets, etc.).	30.7(j) 30.7(k)	15	18 19	12 14

INFORMATION TO BE REPORTED ON SEDS				
Data	FTSR Reference	SED Item Number		
		7525-V	7525-V Alternate (Intermodal)	7513
Commodity Description — A sufficient description of the commodity to permit verification of the Schedule B Commodity Number or the description shown on the validated export license.	30.7(l)	14	20	14
Schedule B Commodity Number — The commodity number and "check digit" as provided in Schedule B — Statistical Classification of Domestic and Foreign Commodities Exported from the United States. When form 7513 is used, report only the first six digits of the Schedule B commodity number.	30.7(l) 30.8(e)	17	24	15
Gross Shipping Weight — (For vessel and air shipments only) The gross shipping weight in kilograms, including the weight of containers but excluding carrier equipment (Multiply lbs. by 0.4536 to get kilos; round off to whole numbers.).	30.7(o)	19	21	13
"D" (Domestic) or "F" (Foreign) (a) Domestic exports — merchandise grown, produced, or manufactured (including imported merchandise which has been enhanced in value) in the United States. (b) Foreign exports — merchandise that has entered the United States and is being reexported in the same condition as when imported.	30.7(p)	16	23	NA
Net Quantity — The amount in terms of the unit(s) specified in Schedule B with the unit indicated or the unit as specified on the validated export license. (Report whole units.)	30.7(n)	18	25	16
Value — Selling price or cost if not sold, including inland freight, insurance, and other charges to U.S. port of export, but excluding unconditional discounts and commissions (nearest whole dollar, omit cents).	30.7(q)	20	26	17
Export License Number or Symbol — Validated export license number and expiration date or general license symbol.	30.7(m)	21	27	14
Export Control Commodity Number (ECCN) — (When required) ECCN number of commodities listed on the Commodity Control List (commodities subject to U.S. Department of Commerce export controls) in the Export Administration Regulations.	30.7(m)	22	28	15
Bill of Lading or Air Waybill Number — The exporting carrier's bill of lading or air waybill number.	30.22(b)	3	5(a)	NA
Date of Exportation — (Not required for vessel and postal shipments) The date of departure or date of clearance, if date of departure is not known.	30.7(r)	2	32	NA
Designation of Agent — Signature of exporter authorizing the named agent to effect the export when such agent does not have formal power of attorney.	30.7(s) 30.4	23	29	NA
Signature — Signature of exporter or authorized agent certifying the truth and accuracy of the information on the SED.	30.7(s) 30.4	24	36	18
Additional Information Required Only on Form 7513				
U.S. Port of Arrival — The U.S. port at which the merchandise arrived from a foreign country.	30.8(a)	NA	NA	9
Country from Which Shipped — The foreign country where the merchandise was loaded on the carrier that brought it to the United States.	30.8(b)	NA	NA	10
Date of Arrival — The date on which the merchandise arrived in the United States.	30.8(c)	NA	NA	11
Country of Origin — The country in which the merchandise was mined, grown, manufactured or substantially transformed. If the country of origin is not known, show the country of shipment designated as "Country of Shipment."	30.8(d)	NA	NA	12

Customs Form 7501 (030984)

IMPORT COUNTRY SUBCODES

Certain foreign trade reports show the following country subcodes to indicate special tariff treatment afforded some imported articles.

Code	Definition	Code	Definition
OGN	Country of origin; no special program claimed by importer.	CFT	Articles imported under the provisions of the United States Canada Free-Trade Agreement Implementation Act of 1988.
SHIP	Country of Shipment, Country of Origin Unknown.	CBA	Articles imported under the provisions of the Caribbean Basin Economic Recovery Act of 1983.
GSP	Articles imported under the Generalized System of Preferences (GSP) provisions of the HTS.	IFT	Articles imported under the provisions of the Israel Free Trade Implementation Act of 1985.
PTA	Articles imported under the provisions of the U.S.-Canada Automotive Products Trade Act.	CFA	Articles imported under the Compact of Free Associations Act.
ACA	Articles imported under the provisions of the Agreement on Trade in Civil Aircraft.		

TYPES OF DUTY (RATE PROVISION) CODES

The following codes indicate the free or dutiable status of merchandise imported into the United States:

FREE ITEMS:

Code	Definition
00	Articles entered into bonded warehouses or Foreign Trade Zones, duty not applicable.
10	Free under specific provisions for free status prescribed in Rates of Duty columns of HTS chapters 01 to 97, inclusive; or free under certain special classification provisions in HTS chapter 98 except those referred to, by HTS number, elsewhere in this list of rate provision codes.
11	Articles entered into the U.S. Virgin Islands from foreign countries for which no duty is calculated.
13	Free as articles to be processed under bond for exportation, including processes which result in articles manufactured or produced in the United States (see HTS number 9813.00.0520); or free for manufacture in bonded warehouse and export.
14	Free as supplies for certain vessels and aircraft. Includes equipment and repairs to vessels if duty remitted.
16	Free as articles imported by or for the United States Government which otherwise would be dutiable under specific provisions in HTS chapters 01 to 97, inclusive, were it not for the following provisions for free entry in HTS chapter 98, subchapter VIII: Articles for military departments (HTS number 9808.00.3000) Articles for General Services Administration (HTS number 9808.00.4000)

Code	Definition
	Articles for Nuclear Regulatory Commission or the Department of Energy (HTS number 9808.00.5000) Articles for the Commodity Credit Corporation. (HTS number 9808.00.7000)
18	Free under provisions established by legislation, Presidential Proclamation, or administrative action not covered by a more specific free rate provision. Free items specified in chapter 99 of the HTS and articles claiming free entry under special programs such as the Generalized System of Preferences (GSP) are assigned rate provision code 18.

DUTIABLE ITEMS:

61	Dutiable at rates prescribed in the General Rates of Duty column of HTS chapters 01 to 97, inclusive.
62	Dutiable at rates prescribed in the Rates of Duty column labeled "2" of HTS chapters 01 to 97, inclusive.
64	Dutiable at rates prescribed for Israel or Canada in the Special Rates of Duty column in HTS chapters 01 to 97, inclusive.
70	Dutiable at various or special rates prescribed in Rates of Duty columns of HTS chapters 01 to 97, inclusive. No duty calculated.
79	Dutiable at rates prescribed in Rates of Duty columns of HTS chapter 99. No duty calculated.

NOTICE

Special Program Indicators for Import Merchandise Statistics Reports

With the July 1992 statistics, the following country sub-codes and descriptions are effective. Three categories (e.g., primary, secondary and census) of country sub-codes are available for import detailed reports. The primary codes appear in IM145 (Magnetic Tape and/or Compact Disc CD-ROM) and IM146 as outlined below. Secondary Special Program Indicators and Census Special Program Indicators are available only in a supplemental Special Program Indicator magnetic tape or IM146A hard copy report.

Primary Special Program Indicators:

<i>Magnetic Tape and CD-ROM Code</i>	<i>Hard Copy and Microform Code</i>	<i>Description of the Program</i>
0	OGN	Country of Origin; No special programs claimed.
1	SHP	Country of shipment, Country of Origin Unknown
4	GSP	Items Imported under the Generalized System of Preference (GSP) provisions of the HTSUSA.
9	CBA	Items Imported under the Provision of the Caribbean Basin Economic Recovery Act of 1983.
B	PTA	Automotive Products Trade Act. (APTA)
C	ACA	Agreement on Trade in Civil Aircraft.
I	IFT	United States/Israel Free Trade Area Implementation Act of 1985.
J	APA	Andean Trade Preference Act (ATPA)
W	PRR	Puerto Rico product improved in a Caribbean Basin Initiative Country and returned to the U.S.
X	CFT	United States/Canada Free Trade Agreement Implementation Act of 1988.
Z	CFA	Compact of Free Association with Marshall Islands and Federated States of Micronesia.

U.S. Exports Commodity Classification

The CD-ROM for export commodity classifications Schedule B

This **NEW** valuable reference CD-ROM will help you find the Schedule B commodity classification and exact description of your product. Both are required to be reported on the Shipper's Export Declaration. You can also use this valuable data base of commonly recognized terms to locate the Schedule B commodity number(s) for which you need to locate export statistics.

What's in it for you?

Approximately 8,000 official Schedule B export commodity classification numbers.

Official descriptions and commonly recognized names of the commodities.

User-friendly software which allows you to quickly access the commodity number from commonly used names or key words in the description of your product.

REPORTS ORDER FORM 1993

COMPUTER PRINTOUTS OF SELECTED FOREIGN TRADE COMMODITIES

The Bureau of the Census makes available, on a subscription basis, monthly statistical data in the form of computer generated printouts of selected commodities from U.S. import and export trade reports. A description of the reports available under this service, together with subscription costs, are shown on page 2. The cost is based on providing data in units of 1 to 10 commodity classification code numbers.

Subscriptions will begin, in most cases, with the next available month after the receipt of a paid subscription and will continue for a 12-month period. For new subscriptions, please allow 4 to 6 weeks for delivery of the first issue.

Requests for data prior to the subscription period requires a manual operation and will be provided at a cost of \$30 per unit of 1 to 10 commodities for each prior month requested.

If you wish to subscribe to this service, please complete the enclosed order form and return it with your remittance.

Complete copies of U.S. import and export statistical data are available for purchase in the form of compact disk and magnetic tape. Information concerning Foreign Trade Reports and reports order forms may be obtained by writing to the Bureau of the Census, Foreign Trade Division, Washington, D.C. 20233.

Conditions of Agreement

1. The authority to perform special work or services on a cost basis is contained in title 13, U.S.C. 8 and title 15, U.S.C. 1525 (84 stat. 864), relating to services for other organizations and persons. The performance of the work or services involved is authorized only to the extent that they are consistent with the proper performance of the basic public duties and obligations of the Bureau of the Census and the relative importance of this request to others. The right is reserved, therefore, to reject or terminate all or any part of the agreement and return the unused balance of funds advanced if the exigencies of the public interest should require such action.
2. Although every reasonable effort is made to avoid delays, failures, and errors in the performance of its work, it is understood that the Bureau of the Census is not to be held responsible for delays, failures, or errors in the services performed. The cost of recomputations, corrections, or accelerations must be paid for by the requesting party.
3. The information is furnished subject to the limitations and qualifications, if any, transmitted with the information, and the requesting party will respect such limitations in any public use of the information. The Bureau of the Census reserves the right to specify that the material is for use of the purchaser only and may not be published, or to require clearance of any proposed publication of the information. If all of the basic data involved were collected under Government supervision or received by the Government in the regular course of business, the right is reserved to publish the same information and make it generally available without charge or at cost of publication if the Bureau of the Census regards the information to be of general public interest.
4. Ordinarily, the information, files and records are retained for a period of 5 years from date of origin except that electronic data tapes may be blanked after 90 days unless specific arrangements in writing are made to the contrary. It is understood, however, that the Bureau of the Census is not obligated in any way to retain such files and records for any specific period and may dispose of them at such times and in such manner as it may determine appropriate, subject to the regulations of the General Services Administration.

Report Number and Description for Computer Printouts

NOTE: These reports are available from the Bureau of the Census. Use order form on page 3.

Reports	Yearly subscription price for each increment of 10 commodity numbers ¹
IM 145 U.S. General Imports. Presents Harmonized TSUSA commodity, country of origin, customs district of entry, quantity, customs and C.I.F. import values. Current month and cumulative January to date.	\$150
IM 146 U.S. Imports for Consumption. Presents Harmonized TSUSA commodity, country of origin, quantity, customs value and calculated duty. Current month and cumulative January to date.	\$150
EM 545 U.S. Exports of Domestic and Foreign Merchandise. Presents Harmonized Schedule B commodity, country of destination, customs district of exportation, quantity, and f.a.s. value. Current month and cumulative January to date.	\$150

¹Cost is based on furnishing data in sets of 1 to 10 commodity numbers.
Price will not vary with purchase of less than 10 numbers.

¹Subscriptions will begin with the next available month after the receipt of a paid subscription and will continue for a 12-month period. Prior months' data will be provided at a cost of \$30 per unit of 1 to 10 commodity numbers for each prior month requested.

²Use Harmonized Schedule B or TSUSA commodity classification numbers in effect for 1993. If additional space is needed, attach a separate sheet itemizing the report and commodity numbers desired.

³Cost is based on furnishing data in sets of 1 to 10 commodity numbers. Prices are subject to change without notice. Prepayment is required on all orders.

⁴Add \$3 per month to subscription price for foreign airmail postage. Remittances from foreign countries should be made by international money order or draft on a United States bank.

Reports Order Form 1991

Microfiche

Unpublished Foreign Trade Data

The Bureau of the Census makes several statistical reports available in the form of microfiche on a subscription basis.

A list of the reports available for 1991 data under this service, together with monthly and annual subscription costs are shown on page 3. Costs for extracts of individual reports may be obtained by writing to the Foreign Trade Division, Bureau of the Census, Washington, DC 20233.

If you wish to subscribe to any of the reports listed, please complete the enclosed order form and return it with your check or money order to the Bureau of the Census. (Prepayment is required on all orders.)

SPECIAL NOTICE

The Bureau of the Census has discontinued the production of microfiche copies of reports IM 145, IM 146, and EM 545. These data are currently available for purchase in the form of compact disk (CD-ROM). Information about the CD-ROM may be obtained by contacting Data Users Services Division, Bureau of the Census, Washington, D.C. 20233, (301)763-4677.

Additional microfiche reports will be phased out as CD-ROM copies are developed as replacements.

CONDITIONS OF AGREEMENT

1. The authority to perform special work or services on a cost basis is contained in title 13, U.S.C. 8 and title 15, U.S.C. 1525 (84 Stat. 864), relating to services for other organizations and persons. The performance of the work or services involved is authorized only to the extent that they are consistent with the proper performance of the basic public duties and obligations of the Bureau of the Census and the relative importance of this request to others. The right is reserved, therefore, to reject or terminate all or any part of the agreement and return the unused balance of funds advanced if the exigencies of the public interest should require such action.
2. Although every reasonable effort is made to avoid delays, failures, and errors in the performance of its work, it is understood that the Bureau of the Census is not to be held responsible for delays, failures, or errors in the services performed. The cost of recomputations, corrections, or accelerations must be paid for by the requesting party.
3. The information is furnished subject to the limitations and qualifications, if any, transmitted with the information and the requesting party will respect such limitations in any public use of the information. The Bureau of the Census reserves the right to specify that the material is for use of the purchaser only and may not be published, or to require clearance of any proposed publication of the information. If all of the basic data involved were collected under Government supervision or received by the Government in the regular course of business, the right is reserved to publish the same information and make it generally available without charge or at cost of publication if the Bureau of the Census regards the information to be of general public interest.
4. Ordinarily, the information, files, and records are retained for a period of 5 years from date of origin except that electronic data tapes may be blanked after 90 days unless specific arrangements in writing are made to the contrary. It is understood, however, that the Bureau of the Census is not obligated in any way to retain such files and records for any specific period and may dispose of them at such times and in such manner as it may determine appropriate, subject to the regulations of the General Services Administration.

¹ Subscription covers January-December Statistics. Prices are subject to change without notice.

Magnetic Tapes

Unpublished Foreign Trade Data

The Bureau of the Census makes available on a subscription basis magnetic tape copies of statistical data covering U.S. import and export trade. These reports represent complete copies of the most detailed reports available for public reference.

Special conversion tapes are available for correlating the various commodity classification systems and converting certain numeric codes to alphabetic data.

A yearly subscription will cover the 12-month period January–December. Quarterly reports are cumulative for individual quarters, and the annual summary data presents a 12-month aggregate for the calendar year.

Information concerning blocking factors and record format may be obtained by writing to the Foreign Trade Division, Bureau of the Census, Washington, DC 20233.

A list and description of the reports available under this service, together with monthly, quarterly and annual subscription costs, are shown on pages 4 and 5. Subscription costs for 9 track tapes are based on the number of tapes required for each report. Both cost and number of tapes may vary depending upon density choice of 1600 bpi or 6250 bpi. In addition, data copied onto magnetic tape cartridges are also available. Cartridges are IBM 3480 and are recorded in ASCII.

If you wish to subscribe to any of the reports listed, please complete the enclosed order form and return it with your remittance to the Bureau of the Census, Washington, DC 20233.

Special Notice

Due to technology changes, we will soon begin phasing out the standard 9 track 1600 bpi and 6250 bpi reel tapes.

We will continue to make the 9 track tapes available during 1993, however, we suggest that users select the cartridge option whenever possible.

We will announce additional options as they become available.

NOTICE TO USERS OF
CENSUS COMPUTER TAPE COPIES

The Bureau of the Census has taken all reasonable precautions to insure that information recorded on the magnetic tape you purchase will be readable on your equipment. When filling customer orders only new tapes are used. The Bureau tapes are purchased from manufacturers on the General Services Administration's approved list of suppliers. The tapes have been subjected to demanding quality control procedures during manufacture and prior to acceptance by the Government.

If you encounter problems in reading the tapes you receive, we suggest that you request calibration tests on your own tape units before you communicate with us. When you are assured that you have received a defective recording from us, please document the problem as thoroughly as possible and return the defective tape and problem documentation to—

United States International Trade Commission

Notice of Publication

1990 Harmonized Tariff Schedule

USITC Publication No. 2232

AGENCY

United States International Trade Commission.

ACTION

The United States International Trade Commission issued in November 1989 a volume containing the legal text of the Harmonized Tariff Schedule of the United States. This volume is entitled *Harmonized Tariff Schedule of the United States (1990) Annotated for Statistical Reporting Purposes (HTS)*.

The *HTS* has been annotated to include such matters as may be necessary for reporting statistics formulated pursuant to section 484(e), Tariff Act of 1930, as amended (19 U.S.C. 1484(e)). The statistical annotations contained in the *HTS* prescribe the statistical information to be supplied on customs entry and withdrawal forms with respect to articles imported into the customs territory of the United States. Thus, this publication is designed to enable importers, customs brokers, customs officers, and other interested persons to determine (1) the classifications and rates of duty applicable to imported articles and (2) the requirements for reporting statistical data with respect to such imports. This publication may also be used in place of the reporting codes of Schedule B for reporting exports on the Shipper's Export Declaration or under the program for electronic reporting of exports.

Electronic copies of this publication on floppy disc in WordPerfect 5.0 format are available from The National Technical Information Service, Springfield, Va. 22161. Hard copies of the publication are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Subscriptions thereto will be handled as follows:

The *HTS*, including all supplements thereto, can be purchased at a subscription price of \$64.00 for mailing within the United States and possessions. For mailing to all other countries, foreign air mail rates are furnished by the Superintendent of Documents upon request; surface mail subscriptions are \$80.00. The blank form provided below may be used in ordering this publication. Remittances, which must accompany all orders, should be sent *directly* to the Government Printing Office.
